VOL. 27, NO. 2

Seals, Sea Lions and Sea Otters

Alaska's marine mammals are less visible than their terrestrial cousins, but their lives are just as complex. This issue explores the habitats, life cycles, diets and histories of Alaska's seals, northern fur seals, Steller sea lions and sea otters.

These animals have adaptations for life in cold northern waters, such as a blubber layer or extremely dense fur. Some species migrate; others move seasonally with food supply or pack ice. Written by expert biologists and illustrated with colorful, informative photos, this book brings together science, first-hand knowledge and anecdotes for every reader. ■
