

PLEASE NOTE:

Shot lists for the films in Yukon Archives' film/video collections are current only to 1992. These scans are word searchable.

Those acquired since 1992 will not be found in the alpha film shot listings.

The subject index, found in a separate pdf, is helpful to identify content on those films that have been shot-listed.

The 'Current Inventories' document lists the current moving image holdings by format (16mm, 8mm, video) and assigned Yukon Archives film or video number.

There are also single item descriptions of some films/videos in the Yukon Archives Descriptive database found here: <http://yukon.minisisinc.com/index.html>

Choose 'Search Files and Items'

Use drop down menu to choose format 'moving images'
