APPENDIX: SUMMARY OF CANSIM TABLES	58

ACKNOWLEDGEMENTS

The principal author of the 2007 edition of *Northern Indicators* is Andrea Street of First Nations and Northern Statistics. This publication has been prepared under the direction of Pierre Gauvin, Manager, First Nations and Northern Statistics.

NOTE TO USERS

This edition of *Northern Indicators* can only be found as an electronic copy. It is available on Indian and Northern Affairs Canada's website at http://www.ainc-inac.gc.ca/pr/ra/sta e.html.

MAIN DATA SOURCES

This report presents a profile of the social, economic, and public finance characteristics of Yukon, Northwest Territories, and Nunavut. The primary data source for this publication is the Canadian Socio-Economic Information Management System (CANSIM). Maintained by Statistics Canada, the CANSIM database contains statistical information on a variety of topics including measures of Canada's population, economy and industry.

Statistics Canada data collection methodologies can change. Therefore, readers should note that time-series data in this edition may not be comparable to previous editions of *Northern Indicators*. Readers are encouraged to consult footnotes or original data source noting that source data may have changed, or been updated, from previous editions of *Northern Indicators*.

Statistics Canada information is used with the permission of Statistics Canada. Users are forbidden to copy this material and/or redisseminate the data, in an original or modified form, for commercial purposes, without the expressed permission of Statistics Canada. Information on the availability of the wide range of data from Statistics Canada can be obtained from Statistics Canada's Regional Offices, its World Wide Web site at http://www.statcan.ca, and its toll-free access number 1-800-263-1136.

OTHER SITES OF INTEREST:

- The Yukon Bureau of Statistics (http://www.eco.gov.yk.ca/stats/)
- The Northwest Territories Bureau of Statistics (http://www.stats.gov.nt.ca/)
- Government of Nunavut (http://www.gov.nu.ca/)
- Health Canada (http://www.hc-sc.gc.ca)

- 1. Yukon: Data are as of June 2007. 'Other' includes communities such as Champagne, Elsa, Johnson's Crossing, Keno City, Stewart Crossing and Swift River.
- NWT: Data are as of July 2006. Data for communities with 50 persons or less and unorganized areas are suppressed, but are included in the total count.
- 3. Nunavut: Data are as of July 2006. Data for communities with less than 50 persons are suppressed. Other includes: Bathurst Inlet, Umingmaktok, Nanisivik, and Baffin, Keewatin and Kitikmeot unorganized areas (e.g. outpost camps). These community estimates are not official as they are not based on components of population growth. They should be used with caution.

- 1. Total criminal code offences=Crimes of violence + Property + Other Crimes. Numbers may not add to total due to rounding.
- 2. A revision of populations for all years was applied in 2005. Therefore, crime rates may have been affected and caution should be used when comparing these data to that in the previous version of this publication.
- Rates are based on population estimates of police jurisdictions derived from estimates provided by the Demography
 Division of Statistics Canada. The estimates are adjusted for net census undercount
- 4. Crimes of violence include homicide, attempted murder, sexual offences, assault, abduction and robbery.
- 5. Property crimes include breaking and entering, motor vehicle theft, theft over and under \$5,000, stolen goods and fraud.
- 6. Other Crimes include prostitution, gaming and betting, offensive weapons, arson, bail violations, counterfeiting currency, disturbing the peace, escaping custody, indecent acts, kidnapping, public morals, obstructing a public peace officer, prisoner unlawfully at large, trespassing at night, mischief, and other criminal code offences.

- 1. Quarterly totals are calculated from monthly data, not seasonally adjusted.
- 2. NWT includes Nunavut prior to 1999 Q2. Data for Nunavut are not available prior to 1999 Q2.
- 3. Employees include enterprises of all sizes excluding those unclassified according to the North American Industry Classification System. They are based on a monthly sample survey of all employers, except those primarily in agriculture, fishing and trapping, private household services, religious organisations and military personnel of defence services.
- 4. EI Beneficiaries includes recipients of income benefits such as training, job creation, self-employment, sickness, maternity, retirement, fishing, work sharing, adoption, parental and compassionate benefits and exclude employment insurance claimants receiving employment and support measures benefits.

SOURCES:

Statistics Canada, CANSIM, Table 281-0023 (Employees) and 276-0001 (EI Beneficiaries).

- 1. The Labour force survey has been administered in the Yukon since 1992, in the Northwest Territories since 2001 and in Nunavut since 2004 using an alternative methodology than used in the provinces that accommodates some of the operational difficulties inherent to remote locales. The estimates for the three territories are not included in the total for Canada.
- 2. Data for Nunavut only include the 10 largest communities: Iqaluit, Cambridge Bay, Baker Lake, Arviat, Rankin Inlet, Kugluktuk, Pond Inlet, Cape Dorset, Pangnirtung and Igloolik.
- 3. Data do not include members of the armed forces and people living in institutions.
- 4. Please refer to Glossary for definitions.

- 1. \$C = Current dollars; \$K (CPI) = Constant (2002) dollars for Canada, NWT, Yukon and Nunavut.
- 2. Constant dollars are indexed against the Consumer Price Index (CPI, All Items) specific to the geographical area. For the Territories, residents outside of Whitehorse, Yellowknife and Iqaluit are not represented by the CPI.
- 3. NWT includes Nunavut prior to 1999.

SOURCES:

Statistics Canada, CANSIM, 384-0013 (Personal Income per person) and 326-0021 (CPI).

Figure 4.2 RATIO OF EARNINGS FROM WAGES, SALARIES AND SUPPLEMENTARY LABOUR INCOME TO EARNINGS FROM GOVERNMENT TRANSFERS, CANADA, YUKON, NWT, AND NUNAVUT, 1997-2006

NOTES:

Ratio = Wages, Salaries, and Supplementary labour income divided by Current Transfers from Government. Calculated from Table 4.2 data.

SOURCE: Statistics Canada, CANSIM, Table 384-0012.

- 1. NWT includes Nunavut prior to 2001.
- Average weekly earnings are calculated from monthly data and are not seasonally adjusted. Further, they include earnings from overtime.
- 3. Statistics are derived from a monthly sample survey of all employers, except those primarily in agriculture, fishing and trapping, private household services, religious organisations and military personnel of defence services.

- 1. NWT includes Nunavut prior to 2001.
- 2. C = Current dollars.
- 3. \$K = Constant 2002 dollars for Canada, NWT, Yukon and Nunavut. It is indexed against the Consumer Price Index (CPI, All Items) specific to the geographical area. For the Territories, residents outside of Whitehorse, Yellowknife and Iqaluit are not represented by the CPI.
- 4. \$K CA = Constant 2002 dollars. It is indexed against the CPI for Canada.
- Average weekly earnings are calculated from monthly data and not seasonally adjusted. Further, they include earnings from overtime.
- 6. Statistics are derived from a monthly sample survey of all employers, except those primarily in agriculture, fishing and trapping, private household services, religious organisations and military personnel of defence services.
- 7. These data are not directly comparable with personal income per person data in Table 4.1 due to different source and methodology.

- 1. Quarterly statistics are calculated from monthly data, seasonally adjusted.
- 2. NWT includes Nunavut prior to 1999.
- 3. Monthly sales statistics are collected through the Retail Trade Survey, which collects sales and the number of retail locations by province and territory from a sample of retailers. Sales estimates do not include any form of direct selling that bypasses the retail store, e.g. direct door-to-door selling; sales made through automatic vending machines; sales of newspapers or magazines sold directly by printers or publishers; and sales made by book and record clubs. Further, internet retailing activities are included in the survey only when conducted through the same legal structure as the retail establishment.

Statistics Canada, CANSIM, Table 080-0014.

- 1. Total sales for NWT include Nunavut prior to 1999/00.
- 2. No per capita data are available for Nunavut. The per capita sales of the NWT include Nunavut since the distribution centre in Nunavut is not representative of all sales of the territory.

- 1. Fur season is from 01 July to 30 June.
- 2. Current dollar prices are indexed against the Implicit Price Index (IPI), Gross Domestic Product, Final Domestic Demand. Index values for fur season based on the average index for those years (excluding the current dollar price for Nunavut in 1998/99 which is based only on the Final Domestic Demand for 1999 since data prior to 1999 are not available).
- 3. NWT includes Nunavut prior to 1999/00. IPI data are not available for Nunavut or NWT (excluding Nunavut) prior to 1998/99.
- 4. See Table 7.1 for number of pelts sold.

NOTES:

- 1. Data prior to 1999 for the Northwest Territories include Nunavut.
- 2. Revenue includes direct taxes from persons, direct taxes from corporations and government business enterprises, direct taxes from non-residents (withholding taxes), contributions to social insurance plans, taxes on production and imports, other current transfers from persons, investment income, current transfers from federal government, current transfers from provincial governments, and current transfers from local governments.
- 3. Expenditure includes net current expenditure on goods and services, current transfers to persons, current transfers to businesses, current transfers to non-residents, current transfers to federal government, current transfers to provincial governments, current transfers to local governments, and interest on the public debt.
- 4. Calculated from Table 8.1 data indexed against Implicit Price Index (IPI), Gross Domestic Product, Final Domestic Demand (2002=100).

GLOSSARY

CAPITAL CONSUMPTION ALLOWANCE: Allowance for the cost of using up capital in the production process.

CAPITAL EXPENDITURE: Expenditures including the cost of procuring, constructing, and installing new durable plant and machinery and equipment.

CHAINED DOLLARS: In this publication, refers to GDP measured in constant dollars using the chained index method. A chain index is an index which is rebased on a period to period basis, accumulated multiplicatively from a base period value. The base period in this publication is 2002. For more information, please refer to *Chain Fisher Volume Index Methodology*, Statistics Canada catalogue no. 13-604-MIE – No. 42 on the internet at: http://www.statcan.ca/english/freepub/13-605-XIE/2003001/conceptual/fisher/methodology/index.htm

CONSTANT PRICES: A price value expressed at the prices prevailing during a constant reference period. In this publication, constant prices refer to values indexed against the Consumer Price Index (CPI) or the Implicit Price Index during the 2002 reference year.

CONSUMER PRICE INDEX: The CPI measures rates of change of consumer prices over time, within specific urban centers or Canada as a whole. It measures this change by comparing the cost of a fixed basket of commodities based on the expenditures of a target population in a certain reference year, presently 2005.

CURRENT PRICES: A price value expressed at the prices prevailing during the period indicated. All prices and expenditures in this publication are expressed in current prices unless otherwise indicated.

EMPLOYMENT RATE: The percentage of the population 15 years and over that is employed.

FACTOR COST: Value remaining after applicable taxes and subsidies are deducted from market prices, reflecting the costs of labour and capital (i.e. production factors).

FULL TIME EMPLOYMENT: Includes those persons who work 30 hours or more per week at their main or only job.

GROSS DOMESTIC PRODUCT (GDP): The total unduplicated value of goods and services produced in the economic territory of a given country or region during a given period.

GROSS DOMESTIC PRODUCT (GDP) AT BASIC PRICES: Refers to GDP at market prices minus taxes less subsidies on products.

GROSS DOMESTIC PRODUCT (GDP) INCOME BASED: Income based GDP is compensation of employees, plus taxes less subsidies on production and imports, plus gross mixed income, plus gross operating surplus.

GROSS DOMESTIC PRODUCT (GDP) BY INDUSTRY: Equals output by the industry minus the value of intermediate inputs that were purchased from other industries, domestic or foreign. It is a measure of how much an industry has contributed to the value of its output over and above the value of intermediate inputs. GDP by industry for the economy as a whole is the sum of values added by all industries resident in Canada.

IMPLICIT PRICE INDEX (IPI): The IPI used in this publication is the IPI, Final Domestic Demand: an indicator of the price movement in consumption throughout all sectors of the economy, including consumers, government industries and private industries. As of this publication, the reference year for the IPI, as published by Statistics Canada, is 2002.

INTERNATIONAL MIGRATION: Movement from one county to another involving a permanent change in residence. A person who takes up residence in another county is an out-migrant with respect to the county of origin and an in-migrant with respect to the country of destination.

INTERPROVINCIAL MIGRATION: Movement from one province or territory to another involving a permanent change in residence. A person who takes up residence in another province or territory is an out-migrant with respect to the province or territory of origin and an in-migrant with respect to the province or territory of destination.

LABOUR FORCE: The non-institutional population 15 years and over who were either employed, without work but actively looking for work, on temporary layoff but available for work, or had a new job to start in four weeks or less from the reference week and were available for work.

NET MIGRATION = (Interprovincial in-migrants – Interprovincial out-migrants) + (International in-migrants – International out-migrants).

PARTICIPATION RATE: The percentage of the population aged 15 years and over that is in the labour force.

PART TIME EMPLOYMENT: Includes those persons who work less than 30 hours per week at their main or only job.

REPAIR AND MAINTENANCE EXPENDITURE: Expenditures not considered capital; expenditures charged against revenue in the year incurred and made in order to maintain fixed assets or productive capacity in good working conditions.

UNEMPLOYMENT RATE: The percentage of the labour force that is unemployed.

APPENDIX: SUMMARY OF CANSIM TABLES

- 003-0013: Number and value of pelts produced, annual
- 032-0002: Public and private investment, summary by province and territory, annual (dollars)
- **051-0001**: Estimates of population, by age group and sex for July 1, Canada, provinces and territories, annual (persons)
- 051-0004: Components of population growth, Canada, provinces and territories, annual (persons)
- **051-0005**: Estimates of population, Canada, provinces and territories, quarterly (persons)
- **051-0017**: Interprovincial migrants, Canada, provinces and territories, quarterly (persons)
- 051-0037: International migration components, Canada, provinces and territories, quarterly (persons)
- **052-0004**: Projected population, by projection scenario, sex and age group as at July 1, Canada, provinces and territories, annual (persons)
- **080-0014**: Retail trade, sales by trade group based on the North American Industry Classification System (NAICS), monthly
- **126-0001**: Supply and disposition of crude oil and equivalent, monthly (cubic metres)
- 131-0001: Supply and disposition of natural gas, monthly (cubic metres)
- 183-0002: Public sector employment, wages and salaries, monthly
- **183-0006**: Sales of alcoholic beverages by volume, value and per capita 15 years and over, fiscal years ended March 31, annual
- **252-0013**: Crime statistics, by detailed offences, annual (number)
- **276-0001**: Employment Insurance Program (E.I.), income beneficiaries by province, type of income benefit and sex, monthly (persons)
- **281-0023**: Employment (SEPH), unadjusted for seasonal variation, by type of employee for selected industries classified using the North American Industry Classification System (NAICS), monthly (persons)
- **281-0026**: Average weekly earnings (SEPH), unadjusted for seasonal variation, by type of employee for selected industries classified using the North American Industry Classification System (NAICS), monthly (dollars)
- **326-0020**: Consumer Price Index (CPI), 2005 basket, monthly (2002=100)
- **326-0021**: Consumer Price Index (CPI). 2005 basket, annual (2002=100)
- **379-0025**: Gross Domestic Product (GDP) at basic prices, by North American Industry Classification System (NAICS) and province, annual (dollars)
- **384-0001**: Gross Domestic Product (GDP), income-based, provincial economic accounts, annual (dollars)
- 384-0004: Government sector revenue and expenditure, provincial economic accounts, annual (dollars)
- 384-0012: Sources and disposition of personal income, provincial economic accounts, annual (dollars)
- **384-0013**: Selected economic indicators, provincial economic accounts, annual (dollars)
- **384-0036**: Implicit price indexes, Gross Domestic Product (GDP), provincial economic accounts, annual (index, 2002=100)
