

Yukon Employment October 2020

Highlights

- In October 2020, Yukon's labour force was 21,300, the number of employed was 20,100, the number of unemployed was 1,300 and the unemployment rate was 6.1%.
- In February 2020 (i.e., prior to business closures due to COVID-19), Yukon's labour force was 22,000, the number of employed was 21,100, the number of unemployed was 900.
- In October 2020, many Yukoners, who did not look for work, presumably due to business closures, were not counted as unemployed resulting in a decrease in labour force compared to January and February of 2020. **When unemployment is adjusted to reflect this decrease in labour force, Yukon's October's unemployment rate would be 10.3%.**
- Nationally, compared to September 2020 figures, the labour force in Canada increased by 0.3%; the number of employed increased 0.5%; and the number of unemployed decreased by 0.9% in October 2020. Canada's unemployment rate was 8.9%. **When unemployment is adjusted to reflect the decrease in labour force specifically due to COVID-19, Canada's unemployment rate would be 11.3%.**

Note: Labour Force Survey (LFS) data for the territories are three-month moving averages based on the information collected for the third week of each month. Furthermore, some respondents reported that they were laid off but understandably did not look for any job due to the pandemic-related business closures. As informed by Statistics Canada, those respondents were excluded from the labour force and not counted as unemployed.

October 2020

Yukon Employment at a Glance:

Labour Force.....	21,300
Employed.....	20,100
Unemployed.....	1,300
Unemployment Rate...	6.1%
Employment Rate.....	66.1%

Notes: All figures are based on Statistics Canada's Labour Force Survey (LFS) estimates. Statistics Canada reports LFS figures rounded to the nearest hundred. Therefore, components may not add up to the total.

Analyses and data tables in pages 1 through 4 are based on seasonally adjusted numbers. Unadjusted figures are available on pages 5 through 7.

Seasonally adjusted employment figures are widely used and quoted, as they are considered to be a more accurate picture of the current employment situation than unadjusted figures. Some variables, however, are only available on an unadjusted basis. Comparisons between adjusted and unadjusted figures should not be made. For more information, see [definitions on page 8](#).

Comparisons with Canada, Provinces and Territories - Snapshot

Participation Rate, October 2020

Employment Rate, October 2020

The participation rate measures the percentage of the population aged 15 years and over, which is working or actively looking for work. In October 2020, Yukon's participation rate (70.1%) was the highest in Canada, followed by Alberta (69.6%). Note: **This participation rate does not account for the decrease in labour force due to COVID-19.**

Yukon's October's 2020 employment rate (the percentage of the population aged 15 years and over, which is employed), was 66.1%, the highest in Canada, followed by the Northwest Territories (63.2%).

Comparisons with Canada and Selected Provinces - Historical

The Labour Force Survey estimates that 70.1% of Yukoners aged 15 years and over were employed or seeking employment in October 2020.

Yukon's participation rate in October 2020 (70.1%) increased by 0.8 percentage points compared to September 2020 (69.3%) and decreased by 4.7 percentage points compared to the rate in October 2019 (74.8%).

The October 2020 employment rate of 66.1% increased by 1.1 percentage points compared to September 2020 (65.0%) and decreased by 6.0 percentage points compared to October 2019 (72.1%).

Yukon's labour market in terms of participation rate and employment rate tends to be similar to Alberta's. **However, Alberta's monthly data show the shock due to COVID-19, which is not pronounced as much in Yukon's 3-month moving averages.**

Participation Rate, October 2018 - October 2020

Employment Rate, October 2018 - October 2020

Unemployment Rate, October 2018 - October 2020

Unemployment Rate, 25+, Males and Females, October 2018 - October 2020

x = suppressed
Note: Data may not add up to the totals due to rounding.

Labour Force, *Unadjusted* and Annual, aged 15+ years, Yukon

Highlights:

- Compared to September 2020, full-time employment in October 2020 decreased by 400 to 16,700; part-time employment increased by 500 to 3,500. **These changes do not account for the decrease in labour force due to COVID-19.**
- In October 2020, employment in the goods-producing sector (3,200) decreased by 300 compared to September 2020. Employment in the services-producing sector (16,900) increased by 300.
- Of all those employed in October 2020: 41.1% were public sector employees (see note on page 7); 40.6% were private sector employees; and 18.3% were self-employed.

Employment by Age and Sex, October 2018 - October 2020

Unemployment Rate by Age and Sex, October 2018 - October 2020

- Comparing October 2020 to September 2020, the unemployment rate for males aged 15 years and over increased from 7.3% to 7.4%, and the rate for males aged 25 years and over remained the same at 7.3%. Over the same period, the rate for females aged 15 years and over remained the same at 3.8%, and the rate for females aged 25 years and over, decreased from 4.3% to 3.2%. **These unemployment rates do not account for persons not in labour force due to COVID-19.**
- The unemployment rate for Yukon's youth (aged 15-24) increased from a suppression of the rate due to the number of unemployed being less than 200 in September 2020 to a rate of 8.3% in October 2020.

Employment, *Unadjusted*, by Full-time/Part-time, October 2020

Full-time employment as a percentage of all employment, October 2018 - October 2020

- Of employed Yukoners aged 15 years and over, 16,700, or 82.7%, were employed full-time in October 2020. Yukon was tied with Newfoundland as the fifth-highest proportion among other jurisdictions. Nationally, 80.8% of employed Canadians worked full-time in October 2020.
- Of employed Yukon males, 86.0% worked full-time, compared to 80.2% of employed Yukon females.
- Comparing October 2020 to September 2020, full-time employment decreased by 400 to 16,700. Part-time employment increased by 500 to 3,500. **Again, these changes do not account for persons not in labour force due to COVID-19.**

Employment, *Unadjusted*, by Industry, October 2020

	Both sexes	Males	Females
Total employed	20,200	10,000	10,200
Goods-producing sector	3,200	2,500	700
Forestry, fishing, mining, oil and gas	600	600	x
Construction	1,900	1,600	300
Manufacturing	500	200	300
Services-producing sector	16,900	7,500	9,500
Trade	2,700	1,500	1,200
Transportation and warehousing	800	600	200
Finance, insurance, real estate and leasing	500	200	300
Professional, scientific and technical services	1,100	600	500
Educational services	1,500	600	900
Health care and social assistance	3,000	600	2,400
Information, culture and recreation	1,200	700	500
Accommodation and food services	1,300	400	800
Other services	700	200	500
Public administration	3,800	1,800	2,000

x = suppressed Note: Data may not add up to the totals due to rounding.

Notes:

The sum of industries does not equal sector totals as industries with fewer than 500 workers are not shown; row data may not add up to industry totals due to rounding.

'Industry' refers to the general nature of the business carried out by the employer for whom the LFS respondent works (main job only).

- In October 2020, 16,900, or 84.1% of working Yukoners were employed in the services-producing sector, while 3,200, or 15.9%, were employed in the goods-producing sector.

- Of Yukoners working in the goods-producing sector, 59.4% had jobs in the construction industry.

- While females accounted for 55.9% of workers in Yukon's services-producing sector, only 21.9% of the goods-producing sector workers were female.

Goods- and services-producing sectors

The goods-producing sector includes industries that are involved in extracting resources directly from the earth (e.g. farming, mining, logging) or processing the resources (e.g. utilities, construction, manufacturing). Yukon's goods-producing sector consists primarily of industries in construction and mining.

The services-producing sector includes industries involved in the provision of services.

Goods- and Services-Producing Sectors, October 2018 - October 2020

- Employment in Yukon's goods-producing sector peaked in July 2019 with 4,300 workers. Employment in the services-producing sector reached a record-high level (19,100) in July 2017.

- Comparing October 2020 to September 2020, employment in the goods-producing sector decreased by 300 to 3,200 and employment in the services-producing sector increased by 300 to 16,900.

Public and Private Sectors, *Unadjusted*, October 2020

	Both sexes	Males	Females
Total employed	20,200	10,000	10,200
Public sector employees	8,300	3,300	5,000
Total private sector	11,900	6,700	5,200
Private sector employees	8,200	4,400	3,800
Self-employed	3,700	2,300	1,400

Note: Data may not add up to the totals due to rounding.

- In October 2020, 41.1% of working Yukoners were employed by one of the four levels of government in the territory.

- In the private sector, 31.1% were self-employed.

- Comparing October 2020 to September 2020, private sector employment increased by 300 to 11,900 and public sector employment decreased by 200 to 8,300.

Notes: 'Employees' include full-time, part-time, permanent and temporary employees.

'Public employees' are those who work for: a government at the federal, provincial, territorial, municipal, First Nations or other Aboriginal government level; a government service or agency; a Crown corporation; or for a government funded establishment such as schools (including colleges/universities), hospitals and public libraries.

'Private employees' include all employees who work for private firms or businesses.

Public/Private Sector Employment, October 2018 - October 2020

Labour Force Survey Definitions

Employment — Employed persons are those who, during the reference week, did any work for pay or profit, or had a job and were absent from work.

Employment rate — Also referred to as “employment/population ratio,” it is the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, women aged 25 years and over) is the number employed in that group expressed as a percentage of the population for that group.

Goods-Producing Industries — Goods-Producing Industries (or goods sector, or goods industries): includes agriculture, other primary industries (forestry; fishing and trapping; mines, quarries and oil wells), manufacturing, construction and utilities (electric power, gas and water).

Labour force — The labour force is the civilian non-institutional population 15 years of age and over who, during the survey reference week, were employed or unemployed.

Not in the labour force — Persons not in the labour force are those who, during the reference week, were unwilling or unable to offer or supply labour services under conditions existing in their labour markets; that is, they were neither employed nor unemployed.

Participation rate — The participation rate is the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

Reference Week — The reference week is the entire calendar week (from Sunday to Saturday) covered by the Labour Force Survey each month. It is usually the week containing the 15th day of the month. The interviews are conducted during the following week, called the Survey Week, and the labour force status determined is that of the reference week.

Seasonal adjustment — Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated.

Seasonal movements are defined as those that are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.

Self-employed — There are two broad categories of workers: those who work for others and those who work for themselves, namely, the self-employed. The self-employed includes working owners of incorporated businesses, working owners of unincorporated businesses and other self-employed.

Service-Producing Industries — Service-Producing Industries (or service sector, or service industries): includes trade; transportation and warehousing; finance, insurance, real estate and leasing; professional, scientific and technical services; management, administrative and other support; educational services; health care and social assistance; information, culture and recreation; accommodation and food services; other services; and public administration.

Three-Month Moving Average — All monthly figures for the Territories, whether seasonally adjusted or unadjusted, are three-month moving averages – for example, the March 2011 unemployment rate of 4.5% is actually an average of the unemployment rates for the months of January, February and March. April’s unemployment rate became the average of the rates for February, March and April. Because they are three-month moving averages, the Territories’ figures are not included in the calculation of Canada’s numbers.

Unemployment — Unemployed persons are those who, during the reference week, were available for work and were either on temporary layoff, had looked for work in the past four weeks, or had a job to start within the next four weeks.

Unemployment rate — The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number unemployed in that group expressed as a percentage of the labour force for that group.
