

YUKON BUREAU OF STATISTICS

Gross Domestic Product (GDP) by Industry at Basic Prices 2017

Highlights:

- Yukon's real GDP by industry for 2017 was \$2,553.2 million (in chained (2012) dollars); an increase of 2.9% following a 7.0% (revised) increase in 2016.
- In 2017, the largest dollar-amount gain was in the *Construction* sector, with an increase of \$101.1 million, up 48.3% from 2016. The largest dollar-amount decrease was in the *Mining, quarrying, and oil and gas extraction* sector with a contraction of \$67.7 million, down 26.9% from 2016.

The GDP of an industry represents the value added by labour and capital in transforming inputs purchased from other industries into output. This analytical report presents Statistics Canada's latest estimates of Yukon's real GDP by industry at basic prices in chained (2012) dollars. These figures are subject to revision.

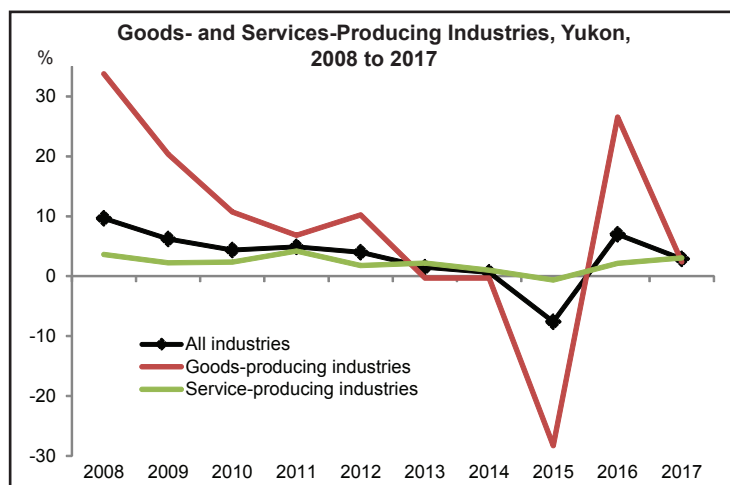

GDP is one of the primary economic indicators used by decision-makers within the governments and financial and other institutions to evaluate the health of the economy. A large increase in real GDP is interpreted as a sign that the economy is doing well, while a small or negative increase indicates poor economic performances.

Growth Rates of GDP by Industry (based on real GDP in chained (2012) dollars)

Note: The current calculation of GDP is based on the input-output structure of the economy in 2015 (benchmark year). Substantial revisions in subsequent years can occur due to updated benchmark year. Please see endnote 2 on page 8.

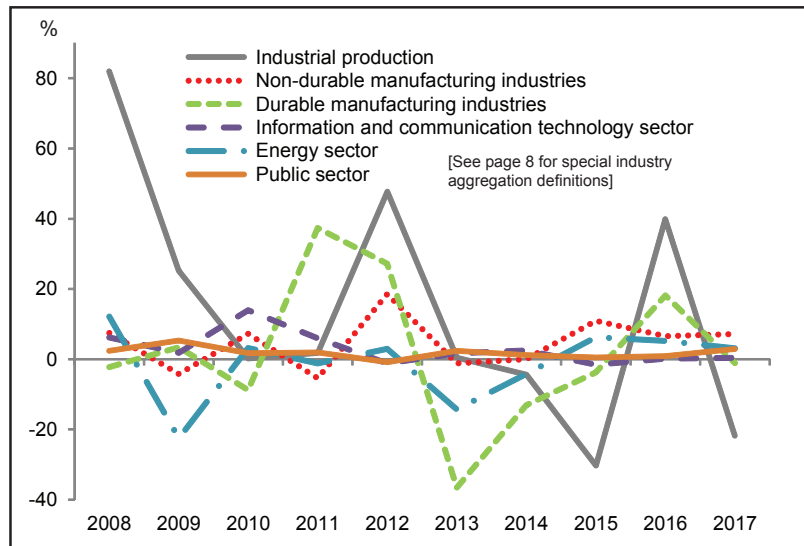

Over the past ten years (revised figures), the growth rate of Yukon's GDP by industry varied from a low of -7.6% in 2016 to a high of 9.7% in 2008. In 2009 through 2012, the high growth rate continued with an overall declining trend. The growth rate slowed down in 2013 and 2014; dropped to -7.6% in 2015; bounced back to 7.0% in 2016. The growth rate in 2017 was 2.9%.

In 2017, Yukon's GDP in the *Goods-producing* industries increased 2.4%; the *Services-producing* industries increased 3.1%.

Between 2008 and 2017, the GDP growth rate for the *Goods-producing* industries fluctuated considerably (from -28.3% in 2015 to 33.8% in 2008) due mainly to activities in *Mining, quarrying, and oil and gas extraction*. However, the GDP growth rate for the *Services-producing* industries fluctuated within a relatively narrow margin (from -0.6% in 2015 to 4.2% in 2011) over the same period.

Growth Rates of GDP by Special Industry Aggregation, Yukon, 2008 to 2017 (based on real GDP in chained (2012) dollars)

- The GDP growth rate in *Industrial production* fluctuated hugely between 2008 to 2017, from -30.3% (revised) in 2015 to 81.9% in 2008.
- The *Energy* sector's GDP growth rate ranged from -22.5% in 2009 (revised) to 12.2% in 2008 (revised).
- The *Information and communications technology* sector's GDP growth rate had a relatively low fluctuation range that varied from -1.6% in 2015 to 14.0% in 2010.
- While manufacturing industries represent less than one percent of the total all-industry GDP, the growth rate for *Non-durable manufacturing industries* fluctuated from -5.4% in 2011 (revised) to 18.6% in 2012 (revised), and that for the *Durable manufacturing industries* fluctuated from -36.6% in 2013 (revised) to 37.3% in 2011 (revised).

Growth Rates of GDP by Industry, Yukon, 2013 to 2017 (based on real GDP in chained (2012) dollars)

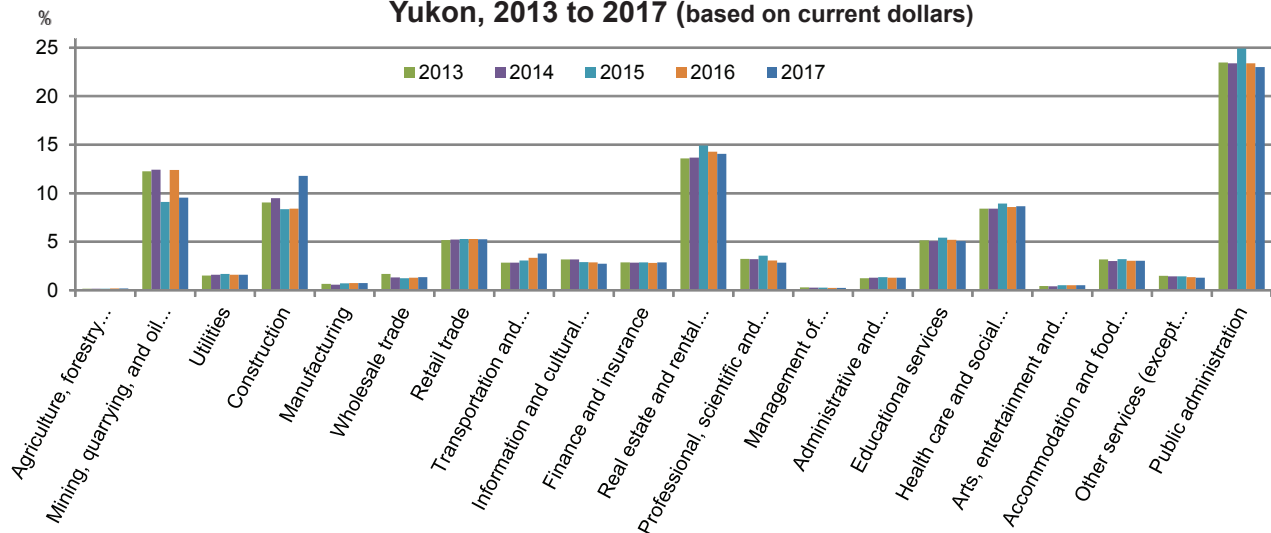

Over the five-year period from 2013 to 2017, the majority of Yukon industries experienced both positive and negative growth rates. The largest fluctuation occurred in the *Mining, quarrying, and oil and gas extraction* sector where the growth rate fluctuated from a low of -37.0% (revised) in 2015 to a high of 50.6% (revised) in 2016.

Percentage Share of GDP by North American Industry Classification System (NAICS), Yukon, 2017 (based on current dollars)

Major contributors to Yukon GDP by industry in 2017 were: *Public administration* (23.0%); *Real estate and rental and leasing* (14.1%); *Construction* (11.8%); *Mining, quarrying, and oil and gas extraction* (9.6%); *Health care and social assistance* (8.7%); *Retail trade* (5.3%); and *Educational services* (5.1%). The contribution of each of the remaining industries was less than 5.0%.

Percentage Share of GDP by North American Industry Classification System (NAICS), Yukon, 2013 to 2017 (based on current dollars)

Over the five-year period from 2013 to 2017, the share of *Construction* industry in total GDP varied from a low of 8.4% in 2015 (revised) and 2016 (revised) to a high of 11.8% in 2017, while the share of *Mining, quarrying, and oil and gas extraction* industry fluctuated from a low of 9.1% (revised) in 2015 to a high of 12.4% in 2014 and 2016. With the exceptions of *Public Administration* (1.9 percentage points spread in fluctuation) and *Real estate and rental and leasing* (1.3 percentage points spread in fluctuation), the fluctuation in the percentage share of all other industries remained within 1.0 percentage point during the period from 2013 to 2017.

¹ See endnote below.

² *Industrial production* - combines the North American Industry Classification System (NAICS) codes 21, 22, 31-33, 562.

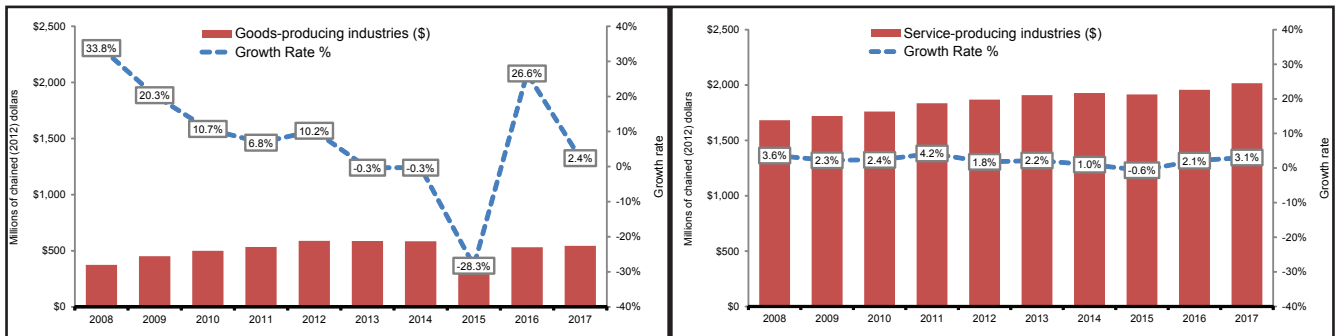

³ *Non-durable manufacturing industries sector* - combines NAICS codes 311-316, 322-326.

⁴ *Durable manufacturing industries sector* - combines NAICS codes 321, 327-339.

⁵ *Information and communication technology sector* - combines NAICS codes 334 (excluding 3345), 4173, 5112, 517, 518, 5415, 8112.

⁶ *Energy sector* - combines NAICS codes 211, 2121, 21229, 213111, 213118, 2211, 2212, 32411, 486.

⁷ *Public sector* - combines NAICS codes 61, 62, 91.

Endnotes:

¹ Statistics Canada uses the chain Fisher volume index method of calculating the real GDP. This method was adopted as it produces the most accurate measure of growth in GDP and its components, and the change brings the Canadian measure in line with the US quarterly Income and Product Accounts which also use the chain Fisher formula to measure real GDP.

An important consequence of using chain indexes is that the associated volume measures are not additive. That is, the sum of the chained values for each component of an aggregate does not equal the chained value of the aggregate. For example, the sum of the components of the Transportation & Warehousing Industry is not equal to the number given for that industry, just as the sum of the individual industry sectors is not equal to the number given for All Industries.

For more information on chain indexes, visit: https://www.statcan.gc.ca/eng/nea/gloss/gloss_c#Chainindex

² The most recent benchmark year for which the input-output structure of Yukon's economy is measured is 2015 and therefore it is the most current year for which the contributions of different industries to GDP may be accurately measured. GDP calculations for subsequent years are projections based on the structure of Yukon's economy in 2015 and changes in prices and output volumes in intervening years. Substantial revisions to these estimates can occur if there are major changes to the structure of the economy; for example, the opening or closing of a large mine after the most recent input/output accounts reference year.

Publication data source: Statistics Canada data tables: 36-10-0402-01 and 36-10-0400-01.
