Vol. 1 #1

KULAN RETURNS

Members of the Dynasty Exploration crew were out to greet the arrival of Alan Kulan today, who drove in from Whitehorse in the company Willys pickup. Kulan was accompanied by William Carson and his wife Leasnew arrivals to the city from Teslin Y.T. (see Social Page)

Kulan reports two near tragedies which were narrowly averted by his quick action and ability. Apparently he failed to negotiate two sections of the Canol Road whilst driving in yesterday. Fortunately he suffered no injuries and the vehicle is reported to have not been damaged. He was not wearing a seat belt, R.C.M.P. say they will not investigate....yet.

N.C. MECHANIC LEAVES BRAGA UPSET.

M. Braga, local cat operator is said to be displeased at the conduct of the N. C. mechanic who left the city today. *-/++## said Braga, apparently the mechanic had left without completing his duties. Braga now has to tighten four bolts and fix the geebosprocken by himself, the job should be finished within five days says Braga.

SPORTS FINAL

Brock and Davis are still in the midst of the semi-finals of the push-up tournament. So far Davis is leading, having done 31 push ups to Brocks 29. At the last match however a protest was levied by Brock who claimed that Davis was cheating by getting a re-bound action off his protruding stomach. No comment was offered by Davis at the time. The tournament still continues.

BRASS ISSUE WARNING

The company management today issued a warning to all men that foul language and disorderly conduct will not be tolerated. The arrival of Mrs. William Carson to the city has initiated the program for a much needed improvement insofar as swearing, spitting, dirty clothes, certain procedures adapted while blowing the nose, noise and general etiquette. It is a well known fact that her husband in the past has shown that he will not tolerate such doings.

DEAR FRED DEPARTMENT

Dear Sir, is it true that certain foods make some people feel more amorous. 'Bachelor' Bachelor, They say that about a number of edibles, but don't get your hopes up. I've been eating the items in question, potatoes, onions, oysters and other shellfish for years and I feel about as usual. However you might think about what Brillat-Savarin said about the truffle: "The truffle is not a positive aphrodisiac, but it may under certain circumstances render women more affectionate and men more amiable." Truffles are globose, whatever that is, brown, black sandy and warty. The taste of truffles has been likened to that of strawberries, garlic, flannel and unclassified. Some

ST. PATRICKS DAY FETE PLANNED Today is St. Patrick's day and celebrations are planned tonite in order to commemorate the feast of this worthy saint. A rason brew was made this morning by Jack Ladue who reports that it should be ready to 'hit the shute' by nine o'clock tonite. All are invited to the celebration, at this time however the address for such is not available.

LOCAL SCHOLAR

Local scholar R.E.G. Davis told the Swim Lake News Herald today that St. Patrick's day originated in Ireland.

Mr. Davis went on further to say that St. Patrick was made a saint because of his duties carried out while exterminating the local Irish poulation of snakes. Some doubt was expressed as to the accuracy of this statement but Davis said that this must be true because as far as he knew there were no snakes left in Ireland today.

SOCIAL HAPPENINGS

The city is pleased to greet Mr. and Mrs. Wm. Carson from Teslin. The Carsons plan to take up residence here while Bill starts on his new job

as master mechanic for Dynast Bill has had much experience in this field, last year he was with Dynasty as a cat skinner but spent much time repairing equipment for the company. HOWEVER....he sure didn't repair the boots that his dog Rufus chewed a hole in, R.C.M.P. are investigatin

BEAVER ARRIVES IN A.M.

A Beaver aircraft arrived this morning at Swim Lake. J. Fairley was out to meet the plane in hope of getting some 'sweety letters'. Later four men managed to quel the still struggling man and freed him from the depths of his sleeping bag. His condition is reported as 'fair', First aid man Harman says it is often common to experience shock because of such an instance. One fragment of letter was recovered fom Fairley's mouth, on it was writtenFather won't speak to me....

Ed. The above title was missprinted, it should read STORK instead of BEAVER.

Thursday March 18, 1965

HARMAN CONDUCTS MERCY MISSION

Andrew Harman, prominent Jack of All Trades around the City is reported to be speedily making his way towards Grew Creek, this news was recieved as the Herald went to press.

Harman is recognized as one who takes human interest to heart and that is why he is now on his way to bring the wife and children of Jack Ladue back to the safety and confines of Swim Lake City. It has been rumoured that Harman also takes a good three day brew to heart as well. Further information will be made available to the public when Harman stumbles back to his home in a few days, maybe.

SPY RING CRACKED BY CITY SLEUTH

The appearance of a mystery man around the city has been solved, posing as a worker from a rival outfit, this man played upon the sympathy of Dynasty officials and gained the use of the Company Bombadier.

Through diligent tracking of hard to recognize Bombadier tracks it was found that the man had worked his way to the rotary drill rig and was busy bribing the young sampler with candy and cigarets in an attempt to gain information as to recent drill results obtained by Dynasty.

He was discovered when Ken Ullmer found the sampler retching an assortment of candy down the bore-hole of SRH 2.

The spy will be handed over to proper authorities, it is understood that he will be charged under the Pure Foods act.

GOOD WORK SAYS OFFICIAL

Good work said a Dynasty official as he handed Lorne VanWhoosits a small gold bucket at a special ceremony held in the honor of this dedicated Bull Cook. Lorne VanWhoosits is a member of the International Brotherhood of Bull Cooks, local 456. During the short time he has worked for Dynasty it was estimated that Lorne hauled 4,567 buckets of hot water and 5,998 buckets of cold water to the kitchen from unknown sources. He also has washed 6,964,733 square feet of floor and 5,001 feet of ~~xxx~~ ceiling and it is said that once in a while he even went outside and washed a few trees.

SPORTS FINAL

At a meeting of the Swim Lake Jock Club last night Davis was overruled in his proposal that a tennis team be organized to represent Swim Lake at next years Davis Cup Final. R.E.G. Davis denied that there was any connection between himself and the world famous tournament.

Braga and Meikle were roundly applauded at the suggestion that a hockey club be organized. Braga kindly offered the use of Dynasty's Z-E 'cat' for the complete removal of snow from Swim Lake. Brock has already approached the Company in concern with the purchase of 3 dozen pairs of skates and 241 hockey sticks, no mention was made about the purchase of pucks.

McKAY MOURNS LOSS

Still badly shaken, Clarence McKay related to reporters today the events that led to the theft of the bottom part of his thermal underwear.

Says driller, McKay, "I don't know why society should let such a thing happen."

Apparently the 'bottoms' had recently been overhauled and washed and were left to dry on a clothes line situated somewhere in the confines of Dynasty's dry. McKay returned later to find that the garment was missing, in its place was left a similar object but 20 sizes smaller.

The missing pants are valuable to the driller in a sentimental way as they had been passed down to him through four generations. "I would not miss them so much if they had not been originally owned by my great, great great uncle Max. Uncle Max wore the same 'bottoms' while fighting under General Sherman."

The 'bottoms' are survived by the 'tops', it is understood that there is a reward offered for their recovery.

SOCIAL

Mr. and Mrs. William Carson have now settled into thier modest new ranch style house at #2 Nigger Head Crescent. The new house is a real success, says Bill, its the kind of ranch house one would expect to find on a homestead one month old situated forty miles from the nearest road. The Carsons will hold a house warming party later this week. Brock says that he will hold several house warming parties every night if he is allowed to bring his 'wife' to the City.

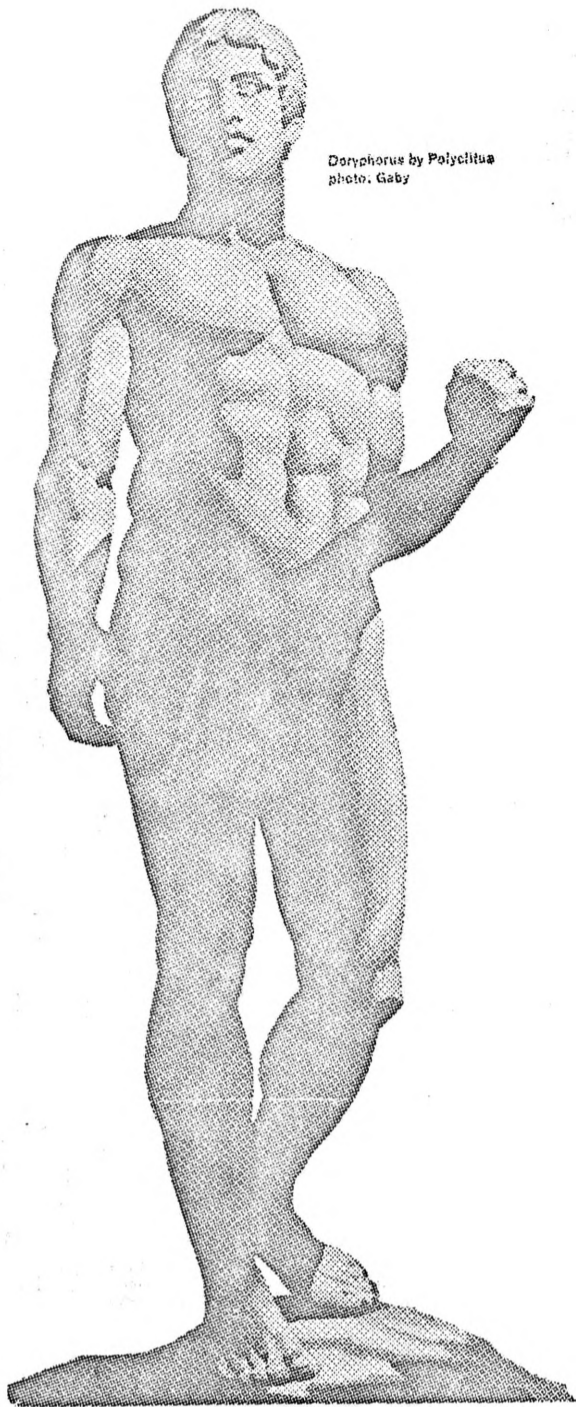

UNCLE HAROLD'S HISTORY LESSON

John C. Calhoun, famous American statesman, was born in South Carolina on March 18, 1782. He was vice-president under John Quincy Adams and also under Andrew Jackson. He was a powerful orator and did all he could to bring on the war of 1812, during which the British captured Washington and burned down the White House. Many amusing Anecdotes are told of Calhoun. For instance-well, I was going to say that he once exclaimed: "I would rather be right than President" but that seems to be Henry Clay. And I'm afraid it was Danial Webster who composed his great speeches while fishing. Anyway, Calhoun's handwriting was terrible, or was that Horace Greeley?

DYNASTY DISCOVERY SHAKES WORLD OF ARCHEOLOGY

J.B. French changes world history.

John B. French, senior sampler and well known prospector has helped unearth what he himself terms 'a most amazing thing'. It is now common knowledge that Dynasty Explorations Ltd. was not searching for base metal sulphides of economic grade but has been busy conducting an intensive study of the Vangorda Area in order to prove a theory of Dr.A.E. Aho, company president.

Dr. Aho has always believed that the Greeks were the first to inhabit the Yukon, unable to convince the scientific world of his theory he studied geological engineering and later formed Dynasty Explorations. Funds for archeologic investigations were raised by selling stock in this 'mining exploration venture'. The most economic way to look for ancient relics of a lost empire is to drill, says Aho. By using a rotary drill, chip samples may be obtained and then glued together to give the original object, such as it looked back in 406 B.C.

John French has just finished gluing together the first statue, a few chips are missing because of the sampling method employed but now that this has been perfected the next statue should be in good shape says French. This first statue has a chip off its shoulder he mentioned.

Aho says all Dynasty shareholders are very happy about the discovery. At first some were a little concerned but now they all realize the investment was 'well worth it', some even said that money is not everything and they are glad Dr. Aho has shown them that a contribution to the world of archeology is better than a million dollar personal capital gain.

The first statue as shown is incomplete in form according to David Meikle, archeologist in disguise as a party chief for United. Meikle says that the left hand should be holding a placard saying, "I am a deaf mute, please help me find my clothes".

EAT PAPER, CHEAP

Dynasty Explorations proposes to charge John S. Brock for freight, because of the large number of newspapers and periodicals he subscribes to. A. Kulan says that sometimes as much as 20lbs. of the Beaver pay load will be comprised of papers for Brock. Brock has expressed disapproval by not letting anyone else read his papers. He does this by cutting them up as he reads them and then eating the pieces.

Dynasty is actually making money on this deal as often Brock is unable to eat his regular meal. The only cost is for a little catsup occasionally, this apparently helps thicker magazine covers go down with a little more ease.

RESIGNATION OF WELL KNOWN CITY MAN

The management of Dynasty Exploration regret to announce the acceptance of the resignation of Lorne VanWhoosits. Lorne, or Packsack as he was affectionately known by his close friends stated that he was forced to leave the company because of some grease burning in his pockets or something, anyway Drisdan didn't help whatever it was. Packsack was interviewed as he boarded the plane. His final statement to the press was, "Yes sir, HA, Ha huh HA, gotta go HO HO HAW".

EXERCISE CAUTION

David Meikle has asked that persons using the public facilities behind Reg's restaurant, exercise the caution usually required when carrying out procedures common to the building so provided. A 'growing' problem is apparent and will continue to 'grow' unless certain parties sit down properly and work it out.

CITY GUIDE GETS RECORD CROCODILE NEAR CUB LAKE

Andrew Harman currently engaged in a hunting expedition around the Cub Lake area has shot what he claims to be 'a goodly sized croc'.

The trophy will be submitted to the Boone and Croc Club for measurement. The Boone and Croc Club was formed in order to record any trophy sized crocodiles shot in North America.

Most residents of the area did not know that excellent crocodile hunting is to be found in many parts of the Yukon. Tracks were reported last year in the vicinity of the Sea area but were not investigated to any great extent.

Two Ross River guides, Peter Sydney (left) and Jack Ladue (right), (crocodile is center), show off Harman's latest trophy.

NEW DRILLING METHOD DEVELOPED BY LOCAL "I've got it made" says driller.

A revolutionary method of rotary drilling has been developed by Ken Ullmer. During the process of 'dry' drilling Ullmer beat the dust problem by operating the controls with a short piece of rope. The rope gradually grew longer and after the drilling was converted to water Ullmer didn't return to the controls but got himself a longer piece of rope. He then was able to operate the drill from the warmth of the sample shack, his helper however had to remain out in the cold in order to give a warning in case the party chief arrived.

Ullmer now has ordered approximately 5,000 feet of rope and plans to test the feasibility of operating the rig from his bunk at the Dynasty Base camp. If this works says Ken, "the possibilities are unlimited I may be able to be in Whitehorse, Calgary or Ciaro, just by jerkin' the 'ol rope the 'ol rig will jus keep goin' on down. If any little troubles come up my helper, Jo, can send me a telegram!"

NO SUNDAY SERVICE

The minister of the SWIM LAKE TABERNACLE OF ALL SINNERS PLANNING TO GET TO HEAVEN BEFORE THE DEVIL GRABS THEM BY THE COAT TAILS says, there will be no church tomorrow. This is because the turnout last Sunday was so bad that the church plans to have a car-wash this Sunday in order to raise funds that were lacking in the collection plate last Sunday and for part of the Sunday before.

"It is indeed a shame", said the minister of the SWIM LAKE TABERNACLE OF ALL SINNERS PLANNING TO GET TO HEAVEN BEFORE THE DEVIL GRABS THEM BY THE COAT TAILS, "one would almost think that Beelzebub and his pals had grabbed a few of our congregation by the coat

tails and maybe even some other articles of their clothing.

MARCH 21 PARTY

Gala celebrations including a parade from Swim Lake to Ross River are planned for to-morrow. There will be fifty-two floats in the parade, among them will be entries from United Geophysical, Dynasty Explorations, Geologic Department, Dynasty Geophysical Department, Reg's Restaurant, Swim Lake Auto Body, Drill Samplers Union Local 377, and The Swim Lake News Herald. All Kiddies should decorate up their bikes as a prize for the best looking bike will be awarded at Ross River. There will also be a bicycle snow riding contest.

GIRLS, GIRLS, GIRLS

Yesterday all the eligible bachelors underwent palpitations of the heart as two of the girls from Ross River strolled through camp. Shirts and ties were donned as a hord of babbling man crazed by the sight of female persons, swarmed from all parts of the city with the hopes of conversing amiably with the two beauties. Mary Sydney, 1963 Ross River Summer Festival Queen and Hazel Peter, this years reigning Pelly River Valley Queen of the Spruce, were glad to recieve such a warm welcome.

Mary and Hazel said they could hardly wait to get back to Ross and tell the rest of the girls about the new drive in theatre that will be built in the city. They said that entertainment for most of the people at Ross is lacking, it was hoped that parking space for dogs and toboggans would be provided as well as for the occassional tent.

"Room space for intents would be nice" said the two girls.

SUNDAY SERMON

Do not let thyself utter foul words as those that have done so have felt their lips wither and rot as well as their tongues dry and shrivel to dust.

"SEE MR. NEILSON, I REALLY AM THE ROSS RIVER M.P."

"SURE, SURE DAVE, I KNOW DRILLING WITH WATER IS OKAY, BUT YOU SEE THE SAMPLING PROCEDURE....."

"I KNOW THAT LOG CAME UP THE DRILL HOLE BUT IT WON'T FIT IN MY GOLD PAN"

"HOPE YOU FELLAS DON'T MIND ME USING YOUR DRY FOR A MINUTE"

"OKAY BROCK, DID YOU SET THE ROTARY RIG ON FIRE OR DIDN'T YOU"

"SO WHAT IF KERR ADDEISSON DON'T GUARD THEIR DRILL RIG, YOU'RE GETTING PAID FOR IT AREN'T YOU"

Monday March 22, 1965

UNLOADING MADE EASY

Some consternation was expressed by officials of Dynasty Explorations in concern with the method to be adopted for unloading the compressor brought in by White Pass for United Geophysical.

A White Pass truck driver applied much originality in developing what is thought to be a relatively new unloading technique insofar as compressors go. Although it was tried a little prematurely it was indeed effective.

The method consisted of 'jack-knifing' his trailer on a steep hill a few miles away from camp. The compressor tipped neatly over and floated gently to the ground to lie on its side. A D 7-E 'cat' was then used to place it back on its wheels after which it was dragged, on its wheels, into the city.

MORE PEOPLE FROM TESLIN

It is rumored that a new man is in camp, apparently he is from Teslin and has come to the city to keep an eye on Bill Carson. Some have said that the new arrival is Carson's younger brother who was sent here by his mother in order to make sure that Bill won't be cruel to his dogs.

NEW COOK COMING FOR DYNASTY FLY CAMP

MR. Y.O.

Forier will arrive in one week in order to start his duties as chef at Harman's Resort and part time Fly Camp. 'Y.O.', as he is affectionately known by people who have not tasted his epicurian delights was delighted at the prospect of leaving his post as chef at Longchamps in New York and joining the staff of Dynasty Explorations. Y.O. is a master of all gastronomical preparations from Liptons Instant Soup to instant stew. He is pictured here with his world famous collection of cookbooks. A News Herald reporter swears that the covers are misleading, actually they are not cookbooks but bound editions of Playboy Magazine.

Y. O. FORIER.

MUSIC

A recital in the Swim Lake Bijou will be held by Mr. J.F. Fairley tonight at 8:30. Mr. Fairley is a well known master of the mandolin and has been made famous by his renditions of such well known works as 'God Save

GONE FISHING NO DRILLING

The boys must have some recreation said David Meikle. Therefore every Sunday it is planned that something different from ordinary drilling be done. Last Sunday we all went fishing he said, as well as being good exercise for the men it develops their appreciation of general values.

No large catches were made, but a good time was had by all, picnic lunches were provided by Reg's and many others dropped in to join with the happy crowd.

EDITORIAL

The other day most of the men were either sleeping or working out in the field so I decided to take the opportunity of going through some of their personal belongings. As I had a few hours on my hands I did a pretty thorough job, after a while I became aware of an extraordinary amount of literature hidden away amongst many of the men's personal effects.

I was both shocked and disgusted to see that a great majority of their reading material consisted of 'pulp' magazines filled with fiction of poor taste. Such pages I had never read before, pages full of lurid scenes, torrid affairs of passion and descriptions of the private lives of obviously 'sick' persons filled with the desire for lust and ugliness.

My first reaction was to collect all of this trash and burn it in a giant bonfire but I didn't. I have decided to make an appeal to all the victims who have fallen by the literary wayside and succumbed to the degeneracies of the world of 'True Confessions', 'For Men Only' and 'The Illustrated Encyclopedia of Sex'. Unite with me tomorrow, bring with you your libraries of lust and we will destroy them together. Later I will be able to distribute among you some selections from the Masters, we will all study these and perhaps seminars can be held to for instance, bash about some ideas on Keates. I have some jolly fine things written by Browning as well.

When things go wrong on the job, it is both glorious and wonderful to behold men standing quietly around their broken equipment and bantering light quips back and forth from the works of Shakespeare. Instead of thoughts racing madly through their minds such as "...through the moonlight I could see her running to me, our lips met, madly, passionately, with insane desire I....."

GAS UP YOUR CAT

Catipillar bulldozers fueled with gasoline will possibly contribute to what may be a new Sunday Sports Spectacular. A trial run was made with a gassed up cat on the Pelly River Road. The throttle was opened, forty feet of growler steel laid and a quarter mile run in ten seconds. The motor ran an extra two miles through an area of heavy timber only to be brought to a stop twelve seconds later by a rock bluff.

Tuesday March 23, 1965

Vol. 1, #6

STRIKE PLANS ANNOUNCED

R.E.G. Davis, exploration manager for Dynasty Explorations announced yesterday that a strike vote will be held amongst members of his staff.

Persons employed directly in the field of mining exploration are and have been protesting against the living accommodations in which they are housed.

A representative of Local 244 Federation of Field Workers, spoke to the press. "Its terrible," he said, "the walls are unpainted, there are no carpets on the floors and heating is provided by a furnace right in the same room that one is expected to live in. We have investigated and found that there is not even one flush-type disposal system for sewage!"

MOUNTAIN OF LOOT FOUND

A tree cache was found by M. Braga aged 21 while he was constructing a road near Cub Lake. The supporting tree was knocked over and the cache fell to the ground. It contained 49 pairs of needle nosed pliers, 9 Brunton compasses 456 tins of concentrated juice, 677 pounds of grow-ser steel, one Willys pickup truck page 2, see CACHE

NEEDLE MAN MAKES GOOD

Jo Lehmann, drillers assistant, says all persons planning to go into the drilling business should apprentice in a needle factory. Jo did when he was in Germany and he attributes this to his success in the rotary drilling business.

"Handling drill rods is like heaving around big needles" says driller Jo. "If you happen to lose a drill rod somewhere in a haystack they are easier to find than a needle as well!" He also has said that looking for an orebody in this country should be about as easy as finding a drill rod in a haystack. He failed to comment on the dimensions of the haystack.

ANNIVERSARY PARTY FOR NEWSPAPER STAFF

Tomorrow the Swim Lake New Herald will be one week old. The editor offered his congratulations to the staff of reporters, junior editors, photographers, copy boys, columnists, type setters, printers, secretaries, receptionists, janitors, truck drivers, paper boys, and garbage men. An office party will be held for all employees of the newspaper for their fine work.

HUNTING LESSONS

A. Harman reports that his lessons in game identification and tracking are progressing very well. He is personally instructing two men from Ross River. So far they have had basic tracking, Lesson I, and game identification (Intermediate). When the two men graduate in two months they should be real 'Davy Crockets'.

BROCK DENIES VICIOUS RUMOUR

In a formal statement to the press John Sebastian Brock III, denied any knowledge of persons involved in connection with contamination of the air with grease. L. Vanwhoosits was forced to leave the City because of a sinus condition brought about by an excess 'grease content' in the atmosphere.

CITY MAN SEES PANTHERS

A city man says he has seen two black panthers. The two panthers have been sighted regularly by him for the last week. The man is a graduate of Harman's Hunting School where he majored in animal identification. One is a male and the other he is not sure about. Plans are being made to trap the beasts.

SWIM LAKE A.A. GETS GOING

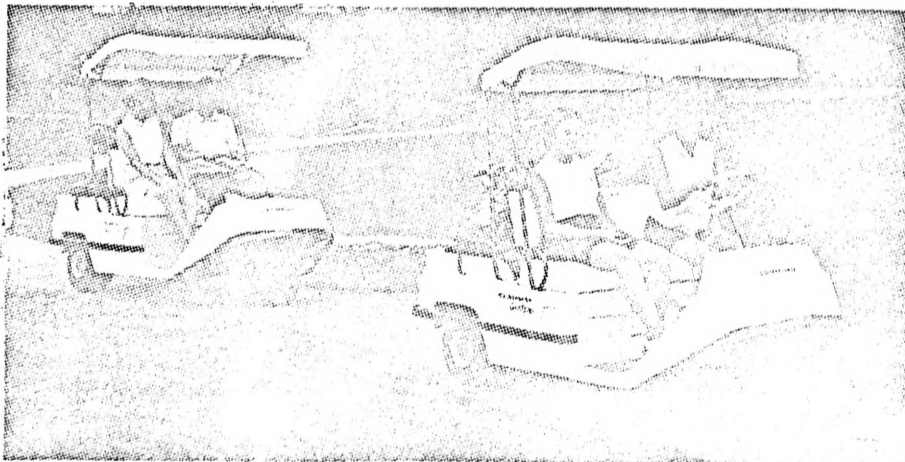

The first meeting of the Swim Lake Alcoholics Anonymous was said to be a real success. There was a good turnout and much business was discussed. New business included plans for a trip to Whitehorse, collecting funds for 200 pounds of raisins and 75 pounds of sugar as well as copper tubing, oak barrels, pressure valves and gauges.

NEW BUSH VEHICLES SLATED FOR DYNASTY

The Dynasty transport division has announced that the company has recently purchased one dozen 'BRUSH BUGGIES'. The vehicles are similar to those in the picture above but do not feature the poppies that are maneuvering the Buggies along the trail. However the company is pleased to mention that each vehicle comes complete with a set of Arnold Palmer #3 special golf clubs. The golf clubs should be useful for digging the buggies out of the muskeg after breakup.

TOWN TALK

Rufus and Dixie are going together again.... Al Kulan is off again tomorrow, where to this time Al? Elmer has been seen around town sporting one of those sad, sad faces, must have lost some bearings again.... Hey gang, what about you know WHO, he has been seen chasing HER again, its a long way to chase up the River for forty miles but some people never learn.... empty bottles in the dry again fellas, baby bottles, who done it.... okay J. French, okay what about it?

BREAKTHROUGH IN MEDICAL WORLD

Dr. Copenhagen has announced that he has finally proven that snoose juice makes one loose. The chewing of snuff, a popular pastime amongst most young people, is said to be physically harmful. Dr. Copenhagen has proven this wrong by conducting experiments on different users of snuff around the Yukon Territory.

Old and young alike were supplied with ample quantities of snuff and instructed to take as much as they could without it interfering with their normal eating habits. The results were tabulated after one year and the following observations made:

- 1) Snuff can be taken during the meal by inserting it in the upper lip.
- 2) Snoose juice can be swallowed to give mild and pleasant palpitations of the heart as well as a slightly dizzy sensation. Nausea only means more snuff must be taken as it is a withdrawal symptom.
- 3) Emily Post has recognized the taking of snuff at dinner parties and all social engagements if the correct procedures of insertion are followed.
- 4) Most women feel that snuff should not be chewed during the course of 'good night' procedures.

CHORALE SOCIETY

There will be a meeting of all interested persons who wish to start practicing a few Christmas Carols. Christmas will be here in another nine months and C. McKay, director, says we will have a very pregnant situation unless a few people shape up now and start working over a few Carols for the coming festive season. All those who will sing in the choir will get a free trip to Whitehorse next Christmas Eve for the world famous Carol Concert held every year at the Whitehorse Inn beer parlour.

MOVIE REVIEW

Last night was the first showing of Tom Jones at the Swim Lake Bijou, it is well worth seeing for those who saw it. That means you should see it twice since there is nothing else to do in this God Awful Burg.

Tom Jones is an old fashioned diamond driller who gets into a lot of trouble. He gets into a lot of trouble with these girls that he makes friends with but his relatives are really rich and tell him to clear out and get a job with some other outfit. Well old Tom Jones hasn't got a car so he rides around the country on a horse and finally gets into so much trouble with a bunch of waitresses or something that some other diamond drillers string him up on a tripod. He doesn't die because his forman comes along and saws down the tripod with a powersaw while he is still on his horse.

DRILLERS TO DRILL WITH HAMMER

United Geophysical will drill down the hole with a hammer. The hole is SRH #3 and the hammer doesn't look like a hammer, it looks like a heavy piece of sewage pipe that is all plugged up.

United says the down the hole hammer is a good answer for fast drilling. Jo Lehman says they never used any hammers in the needle factory but its worth a try.

Apparently the hammer goes down the hole and hammers around. It hammers up and down, occasionally it hammers sideways if things go wrong. If the hammer starts to hammer sideways down the hole then it is time to evacuate because it may start to hammer up after a while and end up anyplace, for instance the cookshack or some other camp building that is used constantly.

They are going to hammer in the morning, evening and all over this land.

RED FEATHER

All residents of Swim Lake City are kindly asked to donate to the canvasser that calls at their door to-morrow.

Contributions will be used to help the not so fortunate of our community. Charitable organizations that will benefit from your donation are; Society for Owners of Lost Bottoms, Swim Lake A.A., Down and Out the Hammer Hole Club and Dynasty Explorations Ltd.

BOOK REVIEW

Man's Illustrated, March 1965, is a book that is really worth having a look at. Don't worry if you can't read very well because all you have to do is look like I said before. Look at page 42 and check out 'Lush Patty Conners'. It says that she is a lush, they also say, 'Patty Conners makes no bones about being a beach scavenger! I think someone has made a mistake because for one thing Miss Patty Conners does not have very many clothes on in some of these pictures on page 42, 43, 44, 45 and she most decidedly does not look like a drunken seagull which is what these guys in Man's Illustrated say. She looks like a D 7 with a ripper on it. Man's Illustrated should have said 'Cat Patty Conners makes no bones about tearing up the grass'.

Thursday March 25, 1965

Vol 1. #8

NEW KITCHEN SLATED FOR REG'S

Reg has complained that customer's are not taking full advantage of the services he supplies. Reg says, "A few persons do not care for the services of our waitress as shown by their continual jumping up and down from the tables in order to get their own food and drink!" Reg went on further to say that one would think these people were brought up in a cafeteria.

Reg has already started to modify the kitchen to supply cafeteria style service in conjunction with the ordinary 'dinning room special' that he customarily provides to his patrons. Shown in the photograph are the new cooks that will help in the cafeteria, they will supply a twenty-four hour service for the people that used to make their own sandwiches and jump around in the dinning room.

SHOW BIZ

A great new act has hit town, coming to Swim Lake direct from Calgary are Mike and Rudy, well known comedians. The show starts tomorrow and should promise to be full of laughs. Persons that have seen it elsewhere say that their routine is really great and provides lots of wholesome fun for all the family.

Apparently the boys come on stage with a metal can that is supposed to be a very sensitive instrument. This is played with for a while amidst much banter and Tomfoolery. The instrument looks for fish, the boys then plot the location of the big fish on a map and more people join the cast to try and catch the fish by blowing air into the ground and spearing it with big needles.

LET LEA LOWER YOUR EARS

Lea has opened the first Swim City Barber shop. Last night there was a long line of customers, some had short hair but wanted a haircut anyway. The facilities will be expanded to offer shaves, shampoos, manicures, boot shines and scalp treatments for those with falling hair.

LETTERS TO THE EDITOR

Dear Sir,
Perhaps one of your readers could tell me if there is a police force in Swim Lake City.

L. Rivard

Dear Sir,
I understand that soon there will be daylight even at night, is this because of the midnight sun? If it does get light at night perhaps you could tell me when.

L. Rivard

Dear Sir,
If I name a mountain in your area 'Mount Goldwater', will Barry Goldwater climb it?

L.B.J.

P.S. Are there any dangerous mauntains in your part of the country? L.B.J.

Dear Sir,
How big is Swim Lake, when does the ice go off it and how deep is it?

G. Griffon (NASA)

MORE FISHING BUT NOT ON SUNDAY

The United crew can't get enough fishing in when the weather is good says boss Dave Meikle. This time they are only fishing for the rare DOWNTHEHOLEHAMMER known only to local bedrock. Special tackle is used for this sport. Already ~~had~~ the action has been tense, Elmer hooked a large DOWNTHEHOLEHAMMER a couple of times but the light sporting tackle would not take the strenuous play offered by the king of fish.

Most of the men are now using a Carson #3 lure. Made solely by Carson it weighs about 85 pounds and spins behind about a three inch diameter 7,000 pound test leader hitched to a Sport Master Kelly Reel. No reports have been recieved concerning the catch with this new equipment.

PLANE TALK

The Beaver FHZ flew in yesterday with lots of mail for everybody. One man was observed weeping uncontrollably behind the 'Dry'. Clutched in his hand were pictures showing what appeared to be a lovely damsel. When asked what was wrong he said that this was the girl his family had picked for him to marry. He is from Vancouver, a place where most families arrange the weddings for their children. As it is in many parts of the world the family of the prospective bride and groom arrange the wedding and all concerned.

"Now I will have to leave Swim City and get married", he wailed, "She is the daughter of Herman VanFoldingstuf and when I marry her I will never be allowed to come back here again, not even to work. Sniff...I will never be allowed to work again, boo hoo...I have to go and live on their dumb estate in Nassau every winter as well.

CHIROPRACTOR NEEDED

There is room for a chiropractor at Swim says the town council. The rough roads in the area are causing bad backs and aching joints. They are also causing bad tempers, bad vehicles, bad feeling, bad words and bad breath.

No, these men are not chiropractors. They are cooks in Reg's new kitchen for cafeteria service. The men shown here are on night shift and are busy making some sandwiches for the drill crew. The seventh cook from the right is not making sandwiches, he is telling a dirty joke to one of his buddies, Reg says he will be fired, tomorrow.

Friday March 26, 1965

Vol. 1. #9

N.C. CAT MAN LIKE SUPERMAN

A new N.C. CATMAN came back to Swim City, he cannot leap tall buildings at a single bound but he did show that he was more powerful than a locomotive. This was demonstrated when N.C. CATMAN fixed the D 7 with his bear hands. He has bare bear paws with such massive power that he can fix up a transmission without the aid of a single tool, he is equipped with X-Ray vision so that he can look inside a transmission and say "nothing wrong here".

These feats of mighty power do not tire out N.C. CATMAN at all, he can work hard and then talk all night without showing the slightest sign of fatigue. N.C. CATMAN has one weakness, SUPERMAN fears the dreaded mineral Kryptonite, N.C. CATMAN has also one enemy, the Lynx. A. Harman shot a lynx and when he turned around N.C. CATMAN was racing away like about 84 of the most powerful locomotives ever seen going through the bush at Swim Lake.

TRAGIC ACCIDENT MARS DISPLAY

A wonderful display of northern lights was interrupted two days ago when Elmer Richert (Is that your last name Elmer?) fell from the top of the rig.

Elmer was interviewed by reporters from his bedside at Swim Lake Lorne Van Whoosits Memorial Hospital. He was watching the lights when he thought he heard them making a noise. He shut off the drill and climbed the drill mast in order to hear them better. C. MacKay said that Elmer was up there for a while and then started to sing 'catch a falling northern light put it in your pocket save it..' and at that instant gave a mighty heave up into the air only to fall to the ground many feet below with badly burned hands.

HAS KULAN LEFT WHITEHORSE YET?

The answer to this popular question around town is NO ! Alan Kulan has not left Whitehorse yet, mainly because he is in jail. Kulan was jailed last night and will be charged tomorrow concerning the theft of the relic sternwheeler, Klondike. Kulans lawyer will plead that Kulan was removing the ship in order to aid the development of the base mineral exploration program being carried out in the Swim Lake Area. Kulan was apprehended on the Canol Road while towing the sternwheeler to Swim City on the back of a 'borrowed' White Pass truck. When asked what he planned to do with the once famous vessel he replied that he was going to mount it on tracks, move the whole City inside it as well as the drill equipment and all exploration personnel and thus keep the Dynasty operations working as an efficient unit. This would save money and be a cheap cheap operation, all under one roof. Save money he babbled, no loss, cheap.

LOCAL SCHOLAR AGAIN

Local Scholar says people eat fish on Friday because fish swim in the sea, fish also have fins, the Russians fought the Fins, the Russians don't have a Friday so as they are our enemies it is a lot of fun to eat fish on a day that does not exist for them.

NEW RADIO NO SPEAK GOOD

Dynasty's new radio, purchased for the sum of \$1400 bucks has a speech impediment. It often speaks good ordinary Yukon English but some days it clams up and only says crackle...zap...zap...bleep bleep. This is frustrating for the radio operator who naturally tends to feel inferior when he cannot understand some of this high priced talk. The radio is called Single Side Winder and when it feels up to scratch it can speak several languages only each must be spoken sideways. It speaks the language of the Single Side Band at Old Crow best, although it is getting pretty good at Selkirk Band no. 2 from Ross River.

TO MUCH SUN

To much sunshine can cause cancer, so wear lots of clothes when you go outside these days. The reflection off the snow may give you what is known as a 'tan' which is the first stages of Galloping Carcenoma. If you smoke and go out in the sun at the same time watch out as you may end up with pictures of your internals in some medical text-book. If you chew snuff, smoke, go out in the sun and breath air polluted with grease, then start burning a couple of candles for yourself. By the way when you do burn the candles, say your prayers a short distance away, candle fumes can cause cancer as well.

HAPPY COMPRESSOR PLAYS TUNE

A leak in the high pressure hose from the compressor makes a lovely whistling sound that is enjoyed by all. Sometimes the hose whistles out the odd tune. Ken Ullmer heard it utter a few bars of 'Drill ye Tarrriers Drill' the other night.

John French says the musical hose can play many different selections, among the more favorite are, The Foggy Foggy Sampling Dust, Swing Low Sweet Kelly Bar, Go Down Moses, On Top of Old Smokey, and Silent Night.

SPORTS

Davis 37, Brock 103 pushups.

"Ouch, okay Gord, okay I'll change it, I'm sorry I said, I'll change it, the typewriter slipped thats all, woops no room to

NEWS GOES MODERN

The News Herald has decided to go modern and go sideways since other advanced forms of communication around the City such as the Single Sidewinder Multibucks All Purpose Language radio used by Alan Kulan to boss his wife around are also sideways....long sentence now ends.

The news is now presented sideways because the 'herald' has recently purchased a new printing press which is capable of handling these interesting sidelights that are presented to you daily. The press is much bigger than the last one and to the layman it appears to be manufactured out of an old Harley-Davidson motorcycle as well as a few pieces of Kenworth truck.

UNITED WE STAND SOMETIMES

David Meikle says that his company likes to have the men stand up while on the job, if they are unable to stand then they receive a warning. If they are caught falling down on the job a second time they are divided from the company. United we stand, divided we fall says Jo.

The men were severely reprimanded for building what appears to be bleachers or grandstands in front of the drill. Kenneth Ullmer, age 47, said the seats are for R.E.G. Davis to sit on while he waits for sulphides to come to surface. While he sits there he gets all dusty and round from hunching over, we call him TUMBLEWEED says the United we stand gang.

SKONSENG SKIDS IN

Edward Skonseng arrived in the city yesterday. 'Ted', as he is called amongst other things by his close friends shook with emotion as he greeted old friends that do not call him Ted. They didn't call him Ted, they said "##" &, is that Skonseng".

Ted comes to us from Mayo where he has been a resident since 1845, originally Mayo was named Skonseng by the Stewart, or sometimes Skonsegg on Stewart but the name was changed to Mayo in 1908 because Ted was really never on or by the River he was usually in it.... chasing 'doz leetal two legged cow moose'.

Teds arrival at Swim City caused many of the residents to recall old stories about Ted. There was the time when Ted worked at Elsa for United Keno Hill, at the same time a few women were also employed by the mine, Ted often spent time in their bunkhouse having a few drinks. One night some of the girls questioned hisand then there was the time Ted and...well Ted the City welcomes you here as long as your friends don't try to burn down sections of the camp such as....

MOTORCYCLE GANG FORMED

The minister of the Sinners Sink or Swim Lake All Purpose Church has announced that he is forming a motorcycle gang in order to provide recreation for the younger set in Swim City. The club will be called the 'SWIM LAKE GRAVECHEETERS MOTORCYCLE CLUB' and although there are no 'cycles yet the boys will practise every night in order to be ready for the day they can get their bikes. The minister has ordered Hondas for the boys, he himself will have an Aerial square four with Western bars, riser pipes, rolled and pleated naugahide buddy seat, chromed scramble fenders and Grasshopper tires.

The boys will get badges for their jackets

MINING EXPLORATION GETS HOLEY IN THE HEAD.

Braga expressed surprise at being told he was to go to Ross River and move a place of worship with his 'cat'. One of the Dynasty officials has heard that the family that prays together stays together, he says that this little slogan also means 'the stock won't lurch if you move a church'. It is going to save us money in the long run says Al Kulan.

COOK'S TOUR

Reg, proprietor of the famous and only eatery in Swim was taken on a guided tour of some of the surrounding country last night. Reg says he is still in the dark as to where everything is but that he had a nice ride on the new Cub County freeway even if he didn't see too much. Reg was very enthusiastic about the trees lining the route, he said it was nice to see them when the headlights of the truck were aimed towards the sky while the vehicle negotiated a few of the unfinished sections of frozen muskeg.

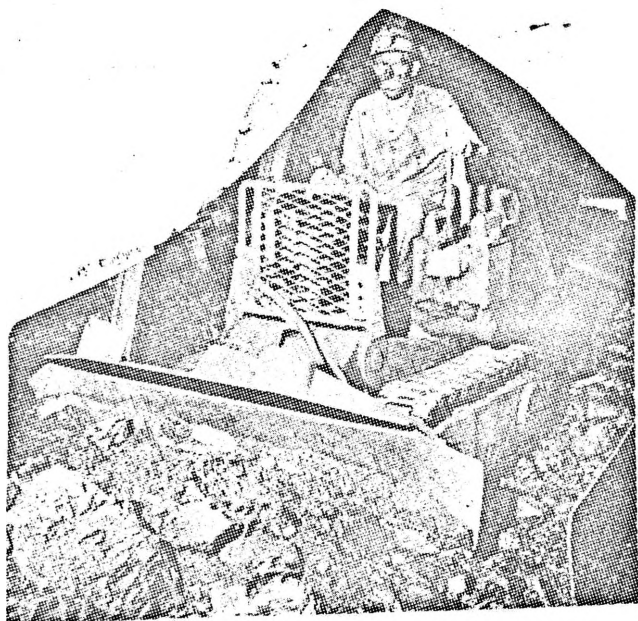

if they excel in the fields of chain swinging, spitting, riding their bikes on the sidewalk with no hands drinking beer at the same time and smashing windows of the rival church SWIM LAKE TABERNACLE FOR THE SAVIOR OF DOWN THE HOLE HAMMERS.

SUNDAY ALL DAY TOMORROW

Sunday tomorrow and another day of rest for the hard working people of our little community. Activities will be varied, the Carson's say they will play a little tennis, R&G Davis will do push ups, Al Kulan will work on his penny collec

"YAHOO, PAYDAY, BUY LOTSA RAISON, MAKE HOME BREAD "

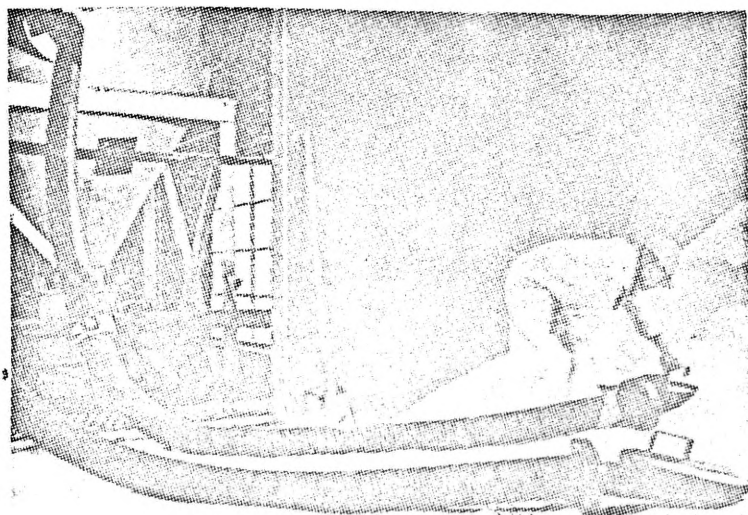

"SURE IT SHRANK, WHADAYA EXPECT WHEN YOU BUY AN UNSANFORIZED D7?"

"ITS GOTTA BE THE WAY HE SAYS SWIM LAKE BY....SIGH"

"ME GEOPHYSICIST, WHAT YOU?"

"WELL WE FINALLY GOT A GOOD DRY SIMPLE PRECIPITATOR NOW WE JUST HAVE TO SORT OUT THE ACTUAL SAMPLE"

"WHATS SO FUNNY ABOUT US BUYING YOUR BOMBADLER?"

SAMPLERS CURE FOR GOLD PAN HANDS

The common drudgery of panning samples day after day involves holding the hands in water for long periods of time. This leads to the common samplers ailment 'Gold Pan Hands'. T. Skonsegg, 23 year old panner says the natural beauty of samplers hands can be retained by a quick and easy method that involves little practice and no expensive medications. 'Pan with your feet' says Ted, 'Keep dose mitts in your pockets, sit back and let dem feets do the job'. There is no danger of getting 'Panners Foot' if you wear a light pair of rubber socks.

BUS DRIVER MISTAKEN FOR DOG-CATCHER

A. Kulan is not the Swim Lake Dog Catcher, he operates the Ross River Transit Truck. Yesterday he arrived in the city with a load of dogs and as a result the paper recieved several inquires as to Al's professional status. Al told us that the dogs paid for their fare, all dogs under one year of age naturally paid half-fare.

GRAVITY MEN CAN'T HOOFF IT

The United Gravity Crew can't walk because they have been brought up around oil camps where such vehicles as helicopters are provided for checking out the country. This is why Dynasty is going to much expense in order to clear survey lines with a cat. The gravity boys can at least drive to each station. One of them lost a lot of weight during the first day he was in the city because no truck was around to drive him from his bunkhouse to Reg's Restaurant. Well boys you can't get to Heaven in a truck, or a 'chopper for that matter.

SOCIAL PAGE

A lot of new faces around town, amongst them are Mr. and Mrs. Mac Peter who came into the city yesterday by bus from their home town Ross River. The Peters are here to visit friends as well as to look into the possibilities of starting a Used Dog Lot. William Peter stopped in for a short stay as well before continuing on to Cub City where he will join Andy Harman as assistant tractor trailer. We also have Robert Edsil with us, Bob is glad to be here and says he will stay until the R.C.M.P are abolished in the Yukon.

BUSINESS AND FINANCE

Personal orders comprise a large portion of our city business. The organization that has gone into this enterprise is great and that is why the service provided has reached a high degree of excellency. Often a personal order reaches the city within weeks and can usually be found within a few days of digging and sifting through the muskeg. Few orders are ever lost, just misplaced in the mud or burned.

'NEWS' SHORT AND VERTICAL

The 'news' today is in short form but fine form. It is also vertical in comparison to our last issue, this is because the staff of the 'News' likes to get a new slant on the different activities in the City. The front page is short because J. Fairley recently donned his chamber-maids outfit and proceeded to 'swamp out' the office. It was only by good fortune that we managed to find our printing press inside the stove. We fooled John though, his mandolin is now in the stove, tonight he will really have 'hot fingers'.

SRH \$

Dynasty is now on SRH \$, the latest hole after SRH #3. This is ~~x\$~~ #3 because this is the hole that is going to drill into the wealth hidden in Mother Natures Bosom. SRH means Shareholders Right Here and \$ means dollars with a capital D. Yes Sir folks old SRH \$ is going to make you rich, for some of us SRH is going to make us see snakes the next time we hit Whitehorse. Snakes Right Here!

RUFUS CARSON RETURNS

Rufus Carson tried to run away but was apprehended by local authorities at the Lapie River. Was Rufus eloping, escaping from his domineering Mother, calling the Cops or trying to elude the Dog Catcher Bus Driver. No one will ever know says his master, Rufus is funny sometimes, says Bill, he doesn't like to talk about it.

FAIRLEY FIGHTS FEAR AS FINGER FRANGED

Shown in the photograph is John F. Fairley, his composure cracked slightly due to shock, sucking his finger. His index finger was not injured as one would think from looking at the photo, his little finger on his right hand was hurt. Fairley has removed his shirt and put on his football helmet.

A great believer in do it yourself medicine, Fairley, his mouth full of bandages, cigarettes, and 292 pills, told the press that as it was his finger it was his responsibility to fix it. The first thing to do is take off your shirt he said, as then you don't have to wash blood off any clothing. The football helmet is to protect his head in case he faints and falls over. Fairley is now in Whitehorse under the care of Dr. Cal Millar.

EDITORIAL

It is with regret that I must point out the shocking disregard for future National Park Land in the area of Swim Lakes. The wanton destruction of nature's gems is being carried on day after day as certain mining explorations companies carry out their conquests of greed.

Witness the access roads, hurriedly pushed through large stands of burn. No heed has been paid to the intricate patterns formed by charred snags that would be a source of pleasure to the more aesthetic. The mounds of sludge heaped and left without being shovelled back into the drill holes from whence they came provide sore spots immediately noticed by ardent admirers of muskeg and buck-brush.

The din and racket uttered by man's machines is slowly driving the animal kingdom away from their homeland. Imagine the fright experienced by the Whiskey Jacks and timid rabbits as a compressor starts up close by and proceeds to render them quivering bundles of fear dominated by the calous procedures of man.

The stark bunkhouses, limited in appreciative design, mar the woodlands and lakeshores. These box-structures clash with the beauty of gently rolling hills of glacial overburden dotted with scrub spruce.

Action must be taken to curb the tragic ruination of the Swim Lake area. Soon Yukon tourists will not venture the 130 miles by air from Whitehorse to visit Nature's Wonderland. The tourist trade will be gone to areas the mining trade has not exploited such as the craggy, rugged, unscenic, common every day St. Elias Range.

SWIM CITY SOLID

Swim City will never be a ghost town anxious citizens were informed. The recent moves by a few residents to Cub County do not signify a thing. Swim City will always be here and there is no reason to ever think it won't be. The recent manufacture of skids as observed by several persons will not be used to transport our buildings to a new site. The skids are being made for members of the united geophysical crew who are presently conducting a gravity survey. One is to haul their lunch on, the other is for geo-

Physical equipment and the really big one is for Rudy.

LEA LEAVES LOVE FOR LABOUR

Lea Carson said goodbye to her husband Bill and left for Cub Country where she will use her cooking talents to keep the Dynasty crew there from contacting scurvey. 'I have to do it, nomatter what the hardships are said Bill's wife. The pioneer community of Cub County has many hardships to bear but Leas got her rifle with her as well as a couple of rolling pins and her dog, a visious Labrador.

NEW STYLES FOR SPRING

Spring has sprung and new Spring 1965 garments for the man about the bush are in evidence.

Driller's Drill trousers, action tailored to look and wear well for all phases of work are very popular this season amongst many of the men about camp. Impeccable in grey and kahki, with or without pleats, these Canadian designed pants by GWC are a 'must' for the progressive worker. Work shirts that withstand all phases of wear and retain a proper princely touch, feature flap breast pockets for those odds and ends that men will collect while on the job and add to the sporting flavor which is required by the more serious. Some fellows are elagantly accoutered in all Aluminum hardhats with matching earflaps of sturdy material, designed by Working Stiff they retail for a low \$8.00.

HALLOWEEN MAY BE SOON

Halloween may be early this year as there promises to be fireworks of unknown magnitude when Dynasty starts to modify its fuel tank farm. The level of the large fuel tanks has dropped to such an extent that filling drums on trucks is almost impossible. The solution says a Dynasty official is to dig a trench that will lower the ground and therefore the truck th t is being fueled. The only way to break the frozen soil for removal is by the use of dynamite. A series of holes will be drilled in front of the tanks and then blasted. John S. Brock retired arsonist of fame and flame requests his vaction at the time of detonation.

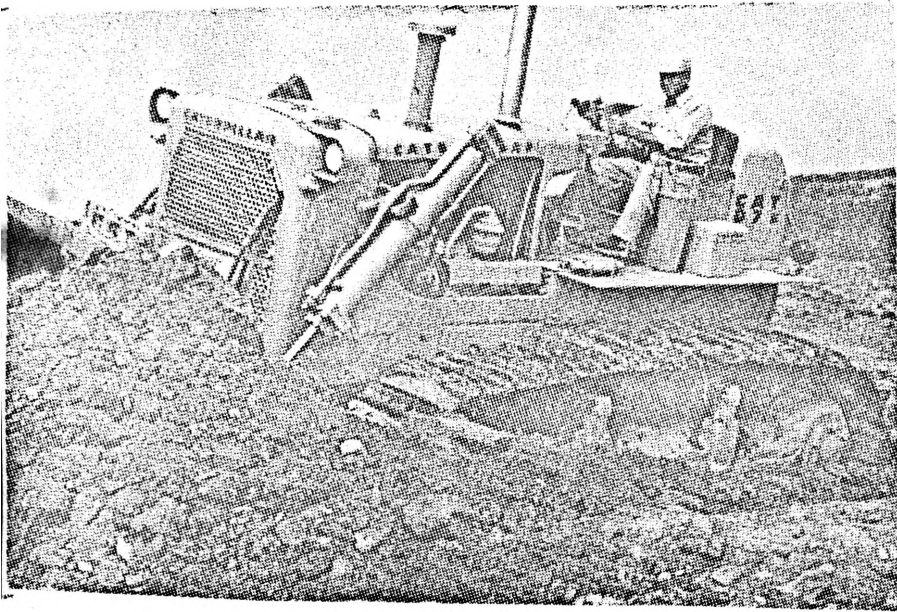

MIKE LOOSES PEEPERS

Mike Grant lost his glasses yesterday while working. Now he will not be able to work because he sees double. Last night he set places for thirty people in the dining hall. Today he has on two shirts two pants and four boots

NO PAPER YESTERDAY, EDITOR BUSY

There was no paper yesterday because the editor was working for a change. "I thought I'd work for some change as Alan Kulan said he would give me \$2.50 an hour if I took the cat up to the Cub" says the editor. He went on further to say that Kulan has not given him the change yet but has suggested that a change of atmosphere might be in order considering what happen to the cat en route.

Brock was instructed to take the D7*E to the Cub and grade the road while doing so. As you can see in the photograph he was keen to carry out his new job, he even has his 'cat-hat' on and looks very serious if not slightly older. The grader at the time the picture was taken was left one mile south and five miles off the right of way in

a deep ravine. The canopy is missing because of circumstances that led to the grader being left in the ravine. Brock decided to finish the road without the grader and is shown here in the picture as he expertly lowers the blade to smooth out a little irregularity on the surface. At the end of the job he said "Hey man, I'm a real coalcat skinner, idler my growlers if I don't C-frame your corner bit an' steerin' clutch your frog"

FAIRLEY SAYS APRIL FOOL

John Fairley played an original April Fool's joke on Dynasty. He led them to believe that he was coming into Swim in an aircraft today. All were waiting for him to arrive when he radioed from Whitehorse that he couldn't make it because of the poor weather. Well the camp fooled him. They radioed a little while later and said that Al Kulan sold his trunk full of camera equipment to William Peter for fifty cents. April Fink Fairley.

DAVIS AND BROCK ON EXPEDITION

Davis and Brock went snowshoing or snowhoeing or something that is spelt like that, yesterday. Davis claimed that the best way to tie snowshoes was the Whitehorse style, Brock said that the most effective method was the Ross River way. Both must have been wrong because after 1/2 mile of travel Brock started to bleed internally and Davis had fallen down so many times that the top of his head was frost-bitten. Aack Ladue says that the best way to get around in the snow is with a Bombadier, you don't have to tie a Bombadier on your feet Jack says.

HARMANS CAMP BUSHED

It is reported that the members of Andy's camp are bushed. As most of you know they are camped in Cub County and have a big clearing around their campsite. At meal time they play 'drive in restaurant' a game where the jeep, cat and dog teams draw up in front of the cooktent and switch on their lights. The dog-team drivers use candles. Leas the cook comes out and takes the orders, then bring the food on trays to each vehicle. Andy says they are not bushed, it is a way to make him think that he is in an A and W. Lea says "That big fresh mug"

SWIM LAKE CITY HAS 'SKID ROW'

Skid row will become a problem says the city fathers, all the skids that are being manufactured here by some of the men are being placed in a row that impedes the progress of our community. It is bad to see these men manufacturing articles that will be a drag to our city. If this goes on we all may end up sliding down the road.

JO TRYING TO SELL SLIDES

Many persons have been approached by Jo who is trying to sell dirty slides taken by himself at Sourdough Rendevous. The dirty slide business is not so good he says, but some fail to realize that I also have some dirty slides taken around Swim Lake. People interested in getting duplicates of Jo's slide collection should contact him or see his agent. Some of his slides are so dirty that they are not even transparent, not even the most powerfull projector could get light through them.

NEW AQUARIUM IN RESTAURENT

Reg and his assistant have started an aquarium in a forty five gallon drum in the restaurant. Featured at the moment are forms of water life captured from local waters, most of the species are small and not harmful when drunk by humans. If persons are interested in drinking out of the aquarium they should instal a filter in their throats in order to catch some of the plantlife in the water which if consumed in large quantities could lead to over-forestation of the stomach and intestinal tract.
