FROM THE FOLKS WHO HELP YOU TO BE HEALTHY

MAY & JUNE 2018

CANCER SCREENING CONTINUING IN MAY

Normally, our cells are healthy, but sometimes instructions get mixed up cells produce lumps or tumors, or spread through the bloodstream to other parts of the body. Most cancers seem to be the result of a mix of risk factors that can be hereditary, the result of lifestyle choices, or due to exposure to cancer-causing substances.

The earlier cancer is found, the easier it is to treat. Get to know your own body and what is normal for you. If you have any concerns, talk to your local nurse or doctor. There are also screening tests that can detect cancer, even if you do not have symptoms.

BREAST CANCER: Mammography (a simple low-dose xray) is recommended for some women over 40 and all women from 50 to 75. Please call Medical Imaging at the Whitehorse General Hospital (867-393-8738) to book an appointment.

CERVICAL CANCER: A Pap test is a test of cells of the cervix, the opening between the vagina and the uterus. The test looks for cells that are not normal and can cause cervical cancer. Most women ages 25 to 69 need regular Pap tests. If you are between 9 and 45 years old, you can get the HPV vaccine, which can help reduce the risk of cervical cancer. There is a women's health clinic on May 29th with Dr. Biss. Please call the clinic and talk to Arlene if you would like to book a Pap.

COLON CANCER: In Yukon, colon cancer is the second leading cause of cancer deaths after lung cancer. FIT is a simple cancer screening test that detects blood in a stool sample, which can be a sign of pre-cancer. If you are between the ages of 50 and 74, call your local health centre to pick up your FIT kit.
