Yukon Telephone Company Ltd.

WHITEHORSE, YUKON TERRITORY
Office: Main Street, Telephone 4600

Office Hours:

Weekdays, 9.00 a.m.-5.00 p.m.

Saturday, 9.00 a.m.-1.00 p.m.

BUSINESS TRANSACTIONS WITH THE COMPANY

PUBLIC NOTICE—The Company's tariffs are open to public inspection and may be seen on application at any of its business offices.

GENERAL—All matters relating to new telephone service, moves, termination of service, directory listings, adjustment of accounts, or any transaction other than payment of bills, must be handled by our business office representatives.

MOVING AND DISCONNECTING OF TELEPHONES—For moving telephones we request subscribers to give us at least ten days' notice in writing. When sufficient notice is given we will endeavor to fill the order on a specified date. If no particular date is stated, the order will be completed as soon as possible. Service will be promptly discontinued upon receipt of proper notice.

EMPLOYEES' CREDENTIALS—All employees of this Company authorized to enter buildings for any telephonic purpose are provided with an identification card, and the public is warned that parties desiring entry should exhibit their identification card upon request or be refused entrance.

HOW TO PLACE A CALL

When you wish to place a call take the receiver off and keep it off while dialing.

Listen for the "dial tone", a steady humming sound, and when you hear it, dial the number you are calling.

After you have dialed, you will hear either the "ringing signal", which is an interrupted "burr-rr-ling" sound indicating that the called telephone is ringing, or the "busy signal", which is an intermittent "buzz-buzz-buzz" sound indicating that the called line is busy.

LONG DISTANCE TELEPHONE CALLS

There are two classes of long-distance telephone calls:

1. STATION TO STATION—when you will talk with anyone who answers at the telephone called.
2. PERSON-TO-PERSON—when you want to talk to a particular person at the telephone called.

PLACING LONG-DISTANCE CALLS—

To place a long-distance call from an automatic (dial) telephone in Whitehorse, dial "0".

Then, if you wish a station-to-station call, give the long-distance operator who answers, the name of the city you want, the telephone number, if you have it, or the name and address under which it is listed.

If you wish a person-to-person call, give the long-distance operator the name of the city you want, the telephone number, if you have it, or the name and address under which it is listed, and the name of the person you want.

COLLECT CALLS—

Upon request of the calling party, the charges on a call will be collected at the called telephone, provided that such charges are accepted by the called telephone. Request to have the charges collected in this way should be made at the time the call is given to the long-distance operator. Simply say: "Please reverse the charge."

TIME OF DAY—

The time of day when conversation actually starts, determined in accordance with the time system in use at the point where the call originates, decides whether day or night rates apply. This rule applies irrespective of whether the call is sent paid or collect.

EXCERPT FROM GENERAL REGULATIONS

Yukon Telephone Company Ltd. — Whitehorse, Y.T.

GENERAL

Telephone service is furnished subject to the following general regulations which shall apply in addition to the specific regulations contained in the tariff applicable to the type of service involved.

These regulations shall apply to all contracts for telephone service and to all services rendered under such contracts, and cannot be varied or waived by any canvasser or other person.

ESTABLISHMENT AND FURNISHING OF SERVICE

APPLICATION

Application for telephone service shall be made on the Company's standard forms which become contracts upon the establishment of the service. All the regulations contained in the tariff shall be part of such contracts for service and all facilities and service rendered thereunder are subject to the Company's

GENERAL REGULATIONS—(Cont'd)

tariffs, and the rules and regulations as filed by the Company with The Controller of the Yukon Territory. Requests from subscribers for additional service or equipment shall be made in writing. Upon approval or installation thereof, such service or equipment is deemed to be covered by the original contract, except that such item of additional service or equipment so installed is subject to the appropriate minimum contract term in accordance with the Company's regulations governing initial contract periods, and to the tariff charges.

ADVANCE PAYMENTS

At the time of application for service, the applicant will be required to pay the proper service connection charges, together with an advance payment equal to one month's charges for exchange service, equipment, mileage, listings, etc.

Notwithstanding the preceding paragraphs, and in addition to the advance payment therein provided, an applicant or subscriber, whose credit standing is not established to the Company's satisfaction, may be required to make a further advance payment of an amount which the Company considers sufficient to cover not more than six months' charges for exchange service, toll service, equipment, mileage, listings, and all other services and charges for which the Company is entitled to receive payment. Charges for service rendered are applied against such advance payment. If, in the opinion of the Company, the subscriber's net credit balance is at any time insufficient to cover the estimated service charges referred to, the Company may require a further advance payment or suspend and terminate service in accordance with the regulations contained in the tariff.

INSTALLATION OF WIRING

Except where otherwise provided in the Company's tariffs or by special agreement, all work of installation of wiring and equipment on the applicant's premises is done by the Company, and the Company attaches its instruments, equipment or lines only to wiring installed by its own employees.

TELEPHONE NUMBERS

The subscriber shall have no property right in the telephone number assigned to him or any right to continuance of service through any particular central office, and the Company may change the telephone number or central office prefix, or both, at its own discretion.

ALTERATIONS

The subscriber shall be required to notify the Company promptly in writing whenever alterations or new construction on premises occupied by him necessitate changes in the Company's wiring or equipment. The Company's regular charges apply to such changes.

PAYMENT FOR SERVICE

Charges for telephone service, equipment and facilities shall be rendered monthly and are due on the date specified by the Company. Charges due in connection with toll, messenger or coin-box service shall be payable monthly or upon request. Advance payments, construction, installation and service connection charges shall be payable in accordance with the regulations here or elsewhere contained in the Company's tariffs.

In all accounts excepting for net rate contracts, the sum of one dollar will be added to the monthly charge, but such sum shall be rebated by the Company provided the account is paid on or before the due date.

If for any reason charges are not paid by the due date, but are paid within one month of the date of issue of the account, the one dollar added to the monthly charge shall be rebated provided the sub-

scriber pays the charge for an additional month's exchange service in advance.

Notwithstanding anything contained in these General Regulations, the Company may render an interim account at any time after the establishment of telephone service with a subscriber for any charges that have accrued, and may demand payment within a period of not less than three days, and failing compliance with such demand for payment, the provisions herein contained relating to "Violation of Company Regulations" shall apply.

All charges incurred by the subscriber are payable at the Company's business offices or at any agencies duly authorized to receive such payments.

Failure to receive a bill showing the amount owed by the subscriber to the Company shall not relieve the subscriber from the responsibility of making prompt payment of such amount to the Company.

The subscriber shall be liable to the Company for all tolls and charges for all calls originating on his telephone regardless of who may originate such calls, and also for all calls received at his telephone the charges for which are accepted by any person receiving such calls regardless of who may accept such charges. The Company, however, reserves the right to collect such charges from the person placing the call or who may otherwise be responsible for the charges incurred.

Messengers may be used, if available, at the request of the person placing a toll call, in trying to locate the called person where he cannot be reached by telephone, provided the calling person agrees to pay the cost of such service.

If objection in writing is not received by the Company within thirty days after a statement of account is rendered, such statement shall be deemed to be correct and binding upon the subscriber.

MAINTENANCE AND REPAIRS

All ordinary expense of maintenance and repairs, unless otherwise specified in the subscriber's application or in the Company's tariffs, is borne by the Company. Upon termination of service any equipment furnished by the Company shall be required to be in good condition, reasonable wear and tear excepted. In the case of damage to or destruction of any such equipment, not due to ordinary wear and tear, the subscriber, on demand, shall pay to the Company the cost of replacing the equipment or restoring it to its original condition. The subscriber shall not rearrange, disconnect or remove, or permit others to rearrange, disconnect or remove, or otherwise interfere with any apparatus or wiring installed by the Company, except with the written consent of the Company.

The Company reserves the right to enter into agreements with railroad companies or other parties, whereby they may be required to instal and maintain telephones and telephone apparatus furnished by the Company, when such telephones and apparatus are located on the railroad premises or in other places involving unusual hazards, or when it is convenient to both parties to do so.

EXCHANGE AND MILEAGE AREAS

The Company may, at any time, change or modify exchange area boundaries or radii beyond which mileage charges apply. Subscribers affected by such changes may, at their option, terminate their contracts for telephone service forthwith upon paying all charges due up to the date of termination. Where, however, the subscriber elects to retain the service, it is furnished only in conformity with the new conditions, rates and regulations prescribed in the Company's tariffs.

VIOLATION OF COMPANY REGULATIONS

In the event of default on the part of the subscriber in making payment of any sum due the Com-

GENERAL REGULATIONS—(Cont'd)

pany, including connecting companies' charges, or in complying with the rules and regulations of the Company which govern the services rendered, the Company may, without notice, suspend the services which it furnishes under any or all service contracts with the subscriber without terminating such service contracts, until all sums due have been paid and all violations have ceased or been remedied; or may terminate any or all service contracts with the subscriber either without or following suspension of service. Such action by the Company shall not affect the subscriber's liability for the payment of all charges owing to the Company.

INITIAL CONTRACT PERIODS**GENERAL**

The initial contract period for all services and facilities furnished by the Company shall be one month, except as stated hereinafter and as may be specifically provided in other sections of the tariff.

PRIVATE BRANCH EXCHANGE SYSTEMS

The initial contract period for manual cordless, dial cordless and manual cord non-multiple private branch exchange systems, excluding trunks and stations, shall be one year.

The initial contract period for manual cord multiple and dial cord non-multiple and multiple private branch exchange systems other than hotel systems, excluding trunks and stations, shall be from three to five years at the discretion of the Company. When additional switchboard positions are installed in connection with multiple private branch exchanges, or when additional equipment, such as switches, switch frames or power apparatus, which entail large installations costs, are installed in connection with dial private branch exchanges, such additional equipment is installed subject to an initial contract period of from three to five years.

The initial contract period for hotel private branch exchanges shall be determined by the Company in each case, having regard to the equipment provided.

SPECIAL NON-STANDARD EQUIPMENT

An initial contract period of longer than one month may be required when special non-standard equipment and special assemblies of equipment are furnished or when equipment is specially installed for a subscriber.

DIRECTORY LISTINGS AND JOINT USER SERVICE

The initial contract period for directory listings and joint user service, where the listing actually appears in the directory, shall be the directory period.

OWNERSHIP AND USE OF EQUIPMENT

Equipment and wiring on the subscriber's premises, furnished by the Company, shall remain the property of the Company. The agents and employees of the Company shall have the right to enter the subscriber's premises at any reasonable hour for the purpose of installing, inspecting, repairing or removing such equipment and wiring, or for the purpose of making collections from coin-boxes. Such equipment shall not be used for performing any part of the work of transmitting, delivering or collecting any telephone message where any toll or consideration has been or is to be paid to any party other than the Company, without the written consent of the Company.

USE OF SUBSCRIBER SERVICE

Subscriber telephone service, as distinguished from public, semi-public and hotel telephone service, shall be furnished only for communications as follows:

In the case of business service, by the sub-

scriber, the agents and representatives of the subscriber and permanent guests or tenants residing in a club or lodging house.

In the case of residence service, by the subscriber and members of his domestic establishment.

The use of the service may, with the Company's permission, be extended to joint users and to persons temporarily subleasing the subscriber's residential premises.

At locations where, in accordance with the Company's definitions of business and residence service, business rates should apply but residence rates are being charged, the Company may thenceforth charge the business rate applicable without the execution of a new application, upon notice given to the subscriber to that effect.

The Company may refuse to furnish subscriber service on premises of a public or semi-public character when the telephone instrument is or would be located so that the public might make use of the service.

The use of the Company's service for annoying other persons or impersonating any individual, and the use of offensive language while using or conversing over the Company's facilities shall not be permitted. The Company may terminate the service of any subscriber who commits any breach of this regulation or who permits any person to use the telephone or service furnished such subscriber contrary to this regulation.

USE OF PARTY-LINE SERVICE

The Company may limit conversations on party lines to five minutes when longer conversations interfere with the use of the service by other subscribers on the same line.

It is a condition of party-line service that the subscriber shall not keep the receiver removed from the instrument when another subscriber to the said party-line service is using the same.

When the use of the service by any party-line subscriber is sufficiently great to prevent a fair and proportionate use by other subscribers on the line, or where a subscriber commits a violation of the condition above mentioned, the Company may require the subscriber to contract for another grade of service or terminate the service of such subscriber.

NON-APPROVED DEVICES

The subscriber shall not use or permit to be used any electrical or mechanical apparatus or device in connection with the equipment or facilities furnished by the Company without the written consent of the Company, or permit the attachment of advertising devices thereto. If any apparatus or devices of any kind other than those furnished or approved by the Company are attached to or connected with any part of the Company's property, the Company may remove such apparatus or devices or terminate the service.

TELEPHONE DIRECTORIES**OWNERSHIP AND USE**

The Company shall be under no obligation to issue directories, but if the Company does issue to its subscribers telephone directories containing the listings of subscribers within a specified area, such directories shall remain the property of the Company and, if requested, shall be surrendered to the Company upon termination of service or upon issuance of new directories in as good condition as when received, reasonable wear and tear excepted. Directories furnished by the Company are not to be defaced in any way and no labels or stamps are to be affixed thereto, nor any changes made therein not authorized by the Company. No binder, holder or auxiliary cover, except as may be supplied by the Company, is to be used in

GENERAL REGULATIONS—(Cont'd)

connection with any directory furnished by the Company.

The contents of telephone directories shall not be published or reproduced in any form whatsoever, without the consent of the Company.

In the case of any breach of these conditions, the Company may resume possession of the directory.

DISTRIBUTION

Directories shall be furnished to subscribers without charge in such numbers as the Company may consider necessary for the efficient use of the service. The Company may make a charge for directories furnished to subscribers in excess of reasonable requirements or replacement of directories lost, destroyed or mutilated by subscribers.

TERMINATION OF SERVICE

Service may be terminated prior to the expiration of the initial contract period upon ten days' notice in writing being given to the Company, and upon payment of the termination charges stated below in addition to all charges due for service which has been furnished.

In the case of service for which the initial contract period is one month, the charges due for the balance of the month shall be paid.

In cases of paid directory listings and joint user service, where the listing has appeared in the directory, the charges due to the end of the directory period shall be paid, except that under the following conditions the termination charges shall be the charges due to the time notice of cancellation is received by the Company, subject to a minimum charge equal to the charge for one month:

When the contract for the main service is terminated.

When the listed party or joint user becomes a subscriber to exchange service.

When the listed party or joint user moves to another location, and becomes a listed party or joint user at that location.

In the case of private branch exchange service for which the initial contract period for service is one year or more, the termination charge shall be the charges due for the balance of the contract period.

In the case of special equipment and facilities for which the initial contract period for service is in excess of one month, the termination charge shall be the charges due for the balance of the contract period.

Service may be terminated prior to the expiration of the initial contract period on payment of all charges due for service which has been furnished, under the following conditions:

In the case of condemnation, destruction or damage of property by fire or other causes beyond the control of the subscriber, necessitating abandonment of the premises, effective from the date that the Company shall be advised thereof.

In the case of death of the subscriber, death of a listed party in connection with the charges for the related paid directory listing, or death of a joint user in connection with service and facilities furnished for the joint user only, effective from the date the Company shall be advised thereof.

In the case of services for which the initial contract period is one month, where the subscriber's service is superseded by another service on the same or different premises, effective from the date of the termination of the old service, except that termination charges shall apply to service and facilities not retained.

When there is a transfer of service by which facilities of the discontinuing subscriber are contracted for by a new subscriber at the same location, effective from the date of termination of the original service, except that termination charges shall apply to service and facilities not retained by the new subscriber.

Service may be terminated by either party after the expiration of the initial contract period upon receipt of ten days' notice in writing and upon payment of all charges due for service furnished.

OBLIGATION AND LIABILITY OF THE COMPANY**SERVICE INTERRUPTIONS**

The Company does not obligate itself to transmit messages but offers the use of its facilities for communication between parties within an exchange area or between exchange areas, each of whom is present at a telephone, or from such parties to the toll switchboard or switchboards. The Company will assume no responsibility, in the event of messages being transmitted by its employees orally, by telephone or by messengers.

The Company does not guarantee uninterrupted working of its lines and equipment and shall not be liable for any loss or damage that may occur in the event that service is interrupted by any cause whatsoever.

DIRECTORY LISTINGS

In any directory which the Company may issue it shall only be required to list a subscriber's telephone under the subscriber's own name; and if, at the request of a subscriber, it inserts any additional name or advertisement in its directories or elsewhere, the Company shall have the right at any time, and from time to time, to alter such additional name or advertisement to the name of the subscriber, notwithstanding anything contained in any contract with the Company.

The Company shall not be liable for damages arising from errors in or omissions of free directory listings; and in the case of paid directory listings its liability shall be limited to making a refund or cancellation of the charges computed at the monthly rate charged for each such listing for the period during which the error or omission continues.

No liability shall attach to the Company by reason of the continuation of the subscriber's directory listings after the termination of the subscriber's contract.

In accepting listings the Company shall not be responsible for the results of their publication in its directories, nor shall it be a party to controversies arising between subscribers or others as a result of listings published in its directories.

DEFACEMENT OF PREMISES

The Company shall not be liable for any defacement or damage to the subscriber's premises resulting from the existence of the Company's equipment and wiring on such premises or by the installation, maintenance, or removal thereof. In cases where the subscriber is not the owner of such premises, the subscriber shall indemnify and save the Company harmless from all such liability.

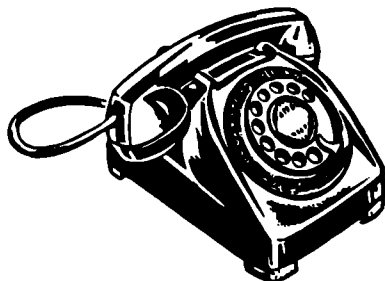

USE OF OTHER COMPANIES' LINES

When the facilities of other telephone companies are used in establishing connections to points not reached by the Company's lines, the Company shall not be liable for any act or omission of any other Company.

WHITEHORSE, Yukon Territory

TELEPHONE

DIRECTORY

TO CALL ANOTHER PARTY ON YOUR LINE

If you are on a party line you can recognize the telephone number of the other party on your line by the fact that it commences with the same three figures as your own. For example, if your number is "3456", the number of the other party on your line will commence with "345".

To call a party on your own line do not dial the directory number, but instead dial "9", followed by the last figure of your number, and the last figure of the number you wish to call. Then hang up your receiver, and the bell on your telephone as well as the bell on the telephone of the party you are calling will ring intermittently until your call is answered. When your bell stops ringing, it indicates that the party called has answered. Remove the receiver and proceed with your conversation.

For example, if your number is "4366" and you want to talk to "4367", dial "9", then the last figure of your number—"6" and the last figure of the number you want to call—"7".

If your bell does not stop ringing after a reasonable period, it indicates that there is no one to answer at the called telephone. Remove your receiver for a few seconds and then replace it. This will stop your bell from ringing and disconnect you from the called telephone.

RADIO TELEPHONE Terminal at Mayo connecting with Whitehorse and Carmacks.

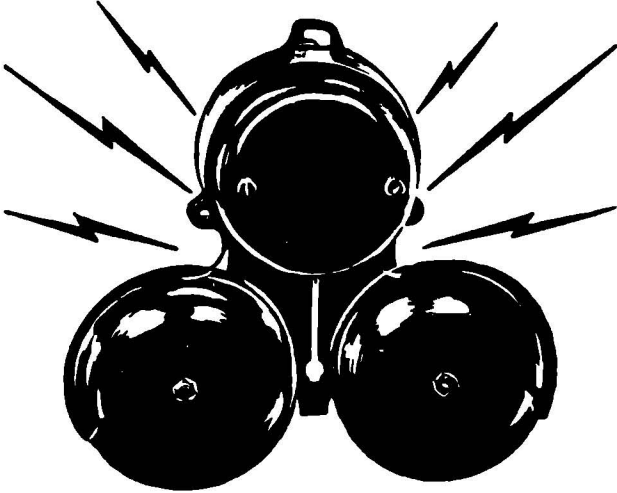

You can carry your firm's name and advertising into the homes and business places of your best prospects by being represented in the Classified section of the Telephone Directory.

INSTRUCTIONS RELATING TO AUTOMATIC TELEPHONES

IMPORTANT

1. REMOVE RECEIVER from hook before operating dial.
2. BRING THE FINGER squarely to the finger stop.
3. DO NOT force the dial back; remove your finger and let it run back itself.
4. ALWAYS HANG UP RECEIVER before making a second call.
5. HANG RECEIVER ON HOOK (SMALL END UP) when through talking. Otherwise no one can call you. (This applies to Desk and Wall Telephones not Monophones.)
6. DO NOT JIGGLE THE RECEIVER HOOK.
7. BUSY BUZZ sound in your ear means the line you called is busy.
8. EXTENSION PHONES. When using always listen and make sure that line is not already in use.

If connection is accidentally broken it should be restored by calling party.

An outside telephone SIGNAL

prevents missing calls!

“Was that the phone ringing, or . . . ?” End this dilemma for all time with an extension bell in the garden, patio or garage—wherever outdoor work and play take you beyond earshot of the ordinary telephone bell.

YUKON TELEPHONE COMPANY LTD.

RADIOTELEPHONE EQUIPMENT

**for sale or rent,
to expand your communications**

So you can contact the radio terminal facilities at Whitehorse, Mayo and Carmacks, we will install modern, efficient equipment for you—either mobile or fixed. The equipment may be purchased outright, on convenient terms or may be rented.

On request we will survey your communications needs and supply complete information without cost or obligation.

Consult the YELLOW PAGES

Call the Merchants listed in the Yellow Pages. They can tell you immediately if the product is available.

SAVING YOUR TIME AND SUPPLYING YOUR NEEDS

Advertisers use the Telephone Directory as an advertising medium because:—

1. **LARGE CIRCULATION** among potential buyers.
2. **COVERS** their market.
3. **ADVERTISEMENTS** alive 24 hours a day.
4. **ECONOMICAL**—With an ever increasing circulation.
5. **ALWAYS CONVENIENT**—Their advertisement in the Phone Book is always at the buyers' elbow.
6. **TIMELY**—It reaches the buyer when he wants what they sell.
7. **EASY TO PAY**—Divided into monthly equal payments added to their phone bill.

100% . . .

**That's What We Aim for in Publishing the
Telephone Directory . . .
to Have It 100% Correct**

BUT—with the large number of subscribers to be listed, street numbers and new numbers, it is easy to see why it is possible for an error to creep in here and there.

Your name and telephone number in this directory are most likely correct. But, if by any chance they are not, you'll do us a favor by telephoning or writing to our Business Office.

**NO MORE
TELEPHONE CORD
KINKS and KNOTS
with
SPRING CORDS**

Coiled spring cords stretch to allow freedom of movement—then contract neatly when the hand-set is replaced. To have a spring cord installed, call the telephone company business office.

YUKON TELEPHONE COMPANY LTD.

Purchasing agents use the Classified Telephone Directory as their buying guide. Why not investigate the sales-building possibilities of advertising in the Classified Telephone Directory? Just call our Business Office.

ALASKA HIGHWAY

Since that bitterly cold pre-dawn hour in March 1942, when the vanguard of the U.S. Corps of Engineers arrived with their equipment at the "end of steel", at the then remote frontier village of Dawson Creek the Alaska Highway has become a legend in the annals of road building. For years only a dream of far-sighted engineers of the north country, the present-day reality of the Alaska Highway is rapidly becoming an important artery of commerce and travel — a link between the industrial regions of the U.S. and the fabulous natural resources of Alaska, a great trade route penetrating the incredible riches of northwestern Canada's wilderness, and a permanent monument to the friendship between two great nations.

First built by the army engineers as an overland lifeline to relieve Alaska from the wartime hazards of shipping, the pioneer road was officially opened in a cold November 20, 1942, before 250 shivering soldiers, civilians and Royal Canadian Mounted Police at "Soldiers' Summit". On this windswept hill, opposite milepost 1061 Kluane Lake, the ceremony of the opening of the "Alcan Highway", as it was then called, brought to a climax an epic of roadbuilding achievement begun only eight months before. Since that time the primitive log bridges have been replaced with structures of steel and the road has been widened and gravelled. The road is presently kept under good repair by the Northwest Highway System who have maintenance camps at several points along the highway. These camps also take care of snow removal and provide emergency ambulance service.

MILE 0 — DAWSON CREEK

The Alaska Highway begins at Dawson Creek, B.C., referred to as "Milepost Zero". From an original population of about 300 in 1942, this town has grown to 10,000 in 1957 and is just getting started. Tapping the great wheat belt of the Peace River country, and centered in an area rich in gold, oil, coal and timber, with recently discovered natural gas and oil, Dawson Creek has a bright future.

The P.G.E. Railway began construction of a line to Dawson Creek in 1955, which will roughly parallel the Hart Highway. At Little Prairie a junction of a branch line will run to Fort St. John. This new rail line will connect the Northern Alberta Railroad at Dawson Creek with the Pacific Coast at Prince Rupert via the C.N.R. and with points in Southern B.C. and the U.S.A. via the existing lines from Prince George. This important rail link will bring the rich agricultural and petroleum industries of the Peace River area within economical shipping distance of West Coast markets. A pipeline to convey natural gas to Vancouver and the U.S.A. is also under construction.

At present this town is the end of the line for railroad transportation connecting with the continental rail systems. From here the new 255 mile John Hart Highway was opened on July 1, 1952 connecting with Prince George, B.C., creating a Pacific route through to Vancouver and Seattle and linking Dawson Creek (and the Alaska Highway) with the Canadian National Railway, and the P.G.E. The John Hart Highway opens up a scenic section of the Rocky Mountains, crossing over the 3060 ft. summit of Pine Pass, and thence south to connect with the famed Caribou Road at Prince George.

MILE 35.5 — TAYLOR

Born in 1955 with the discovery and development of an immense natural gas field in the area, there is already nearly \$50,000,000 earmarked for plants to handle sulphur processing, gas compressing, high octane aviation gas production and other by-products of natural gas. Pipeline will reach from here to Vancouver, B.C. with a branch to western Washington for delivery of natural gas. A wood pulp plant is also projected here.

The new modern Taylor Hotel was recently opened containing every convenience including dining room and cocktail lounge. Motels and cafes have also recently opened along with a modern theatre. With the scheduled building of the new \$6,000,000 Peace River Bridge and other projects in the planning stage, Taylor can well be considered a boom town.

MILE 47 — FORT ST. JOHN

Fort St. John "Y" connecting the side road from the Alaska Highway to the village is visible from a rise to the right (north-bound). Fort St. John is a long-established community, as it was founded in 1806 as a trading post for the Sikanni and Beaver Indians. Due to the modern airport built during the last war, and also to considerable oil exploration in the area, the village is steadily growing and now has several hotels, stores, garages, a theatre and cafes. Connections via air can be made here for any point in North America. An extension of the P.G.E. Railroad is under construction to Fort St. John from Prince George. 1957 also saw the construction of over 200 homes for employees of Pacific Petroleum and another two to three hundred homes are planned for 1958. The Fort St. John Hotel is doing a complete renovation job and the Condill Hotel has extensions being built on both ends at once, along with a new modern cocktail lounge. To us this is just the start of things to come.

MILE 183 — SIKANNI HIGHWAY MAINTENANCE CAMP

Here you will get road information and emergency telephone service. Another seven miles and you will start your ascent to the summit of Trutch Mountain.

MILE 171 — MASON CREEK

Cafe, rooms and cabins along with trailer space and car service, open 24 hours a day.

MILE 190.5 — TRUTCH MOUNTAIN

This is the second highest point of the highway, elevation 4,134 feet.

MILE 200 — TRUTCH

Good hunting for grizzly bear, caribou, goat and moose with guide service available. There is good accommodation here. The repeater station is located here for telephone and telegraph service also the location of another highway maintenance camp.

TRUTCH, B.C. (Mile 200)

Northwest Communication System Repeater Station _0
Peck, D. R. (Trutch Cafe).....233

MILE 233

Newly remodeled buildings here with good sleeping and eating accommodations, also groceries, gas and oil available.

MILE 233 (Via Trutch)

Lum & Abners.....3

MILE 235.9

Drinking water here.

MILE 245

Prophet Maintenance Camp is located here. From here to milepost 350 there are many stretches of winding road seemingly without reason, as though the road builders had followed the aimless wanderings of a moose.

MILE 278.7

Accommodation here catering to motorists, with bunk houses available for truckers.

MILE 295.5

Cabins, gas and oil and automotive repairs.

MILE 296.3

The Muskwa River and 970 ft. steel bridge. This is the lowest point on Alaska Highway — elevation 1,000 feet. This is a fine big game country.

Two good telephone habits:

Quick to answer when your bell rings;
slow to hang up when you call some-
one who does not immediately respond.

"Mile 300"

Fort Nelson, B.C.

MILE 300 — FORT NELSON, B.C. (MUSKWA P.O.)

Fort Nelson or "Muskwa" B.C. is probably the fastest growing boom town of the north due to the oil exploration and discovery in the area in late 1957. This settlement first sprang up around the important highway construction camp here in 1947. It derived the name of Fort Nelson from the original Hudson Bay Trading Post founded in 1800 and located across the Fort Nelson River 8.5 miles from here by side road and accessible only by boating from end of road to far shore. The official Post Office name is now Muskwa. The large military and commercial airport and hospital are also on the side road, 6.5 miles from the highway. Over 150 years ago the Fort Nelson River became the head of navigation here for the fur trade and exploration route which connected through the Liard & Mackenzie Rivers to the Arctic Ocean. Near the confluence of the Fort Nelson the Nahanni River joins the Liard from the northwest traversing the mysterious Nahanni Valley—"Land of Vanishing Men" and "Headless Valley". Many weird tales are heard about gold seekers and trappers disappearing in the region and many years ago two were found minus heads by a search party. The blame has been placed on everything from wolverines to wild and hostile Nahanni Indians. This immense river system connecting many remote outposts is a fur trading, freighting and prospecting route to this day and old Fort Nelson is still headquarters of the B.C. Mackenzie Navigation Co. Fort Nelson, or Muskwa, has good travel facilities with 2 hotels, motels, auto cabins, cafes, several general stores, garages, and a bank. A ranger station and telegraph service is located at the highway maintenance camp, upper end of village.

which empties into the Arctic Ocean. In early days the Liard was another of the northern routes of the fur-traders and explorers, who took many weeks by arduous canoe travel to reach the point of the present bridge to which you have travelled in a few days. This graceful bridge, 1143 feet in length, cost over \$2,800,000 and is a splendid camera subject. Downriver from here 15 miles is the breathtaking "Grand Canyon of the Liard"—a great gorge carved through the Rocky Mountains in past ages by the Liard River. At present this natural wonder can only be viewed from a plane, or by very hardy hikers, accompanied by a guide who knows the route. Seaplanes can land on south side of river near bridge.

MILE 496 — LIARD RIVER

Good accommodation for sleeping, gas and oil. The Liard offers trout and grayling fishing and the hot springs, within a half mile, are well worth a visit.

MILE 496

(Via Coal River, B.C.)

Liard River Lodge (J. E. Parsons).....6R4

MILE 496.5 — LIARD HOT SPRINGS

Located in a park reserve, but undeveloped, afford a chance for a good hot "soak" or a swim. Pool temperatures range between 85 degrees average in winter to 95 average in summer. Vegetation around springs is almost tropical in density and furnished shelter for pioneer highway construction crews who bathed here even in sub-zero weather. A woods road leads off the highway (3rd side road from bridge near sign) for about 175 yards to a turn-around and place to park. From there a foot trail leads 400 yds. across the overflow swamp to first pool, shallow but safer for children and it is 200 yds. farther to 2nd pool, which is deep and fine for a swim.

MILE 513.9

Smith River and bridge. Beside the road here is a fishing spot.

MILE 516.5

Here is the 25 mile side road to Smith River Airport.

MILE 516.5

(Junction Smith River)

Smith River Airport (D.O.T.) via Coal River.....4R3

MILE 528

Telephone and Telegraph Service, gas, oil and minor repairs, also modern cafe and comfortable cabins.

MILE 528

(Via Coal River)

Dew Stop Inn (J. Christy).....6R3

MILE 533 — COAL RIVER AND BRIDGE

The Coal joins the Liard River to the south. This region shows many evidences of the glacial age with many lakes, great gravel beds, and surface signs of past erosion of enormous ice fields. The river is rightly named the "Coal" as lumps of coal may be picked up on the sandbars where they have been washed down by the current. Good fishing for grayling and trout reported here. Spacious trailer parking space available, gas, oil, rooms, etc.

MILE 533

(Via Coal River)

Coal River Hotel (L. Bagnall).....4R2

MILE 538.5

Tourist picnic grounds, on short side road to your left, which leads to lovely Whirlpool Canyon, a few hundred yards from the highway. Here the Liard River is torn into whirling, foaming rapids by several small rocky islands—a favorite camera subject.

MILE 543

Trailer parking, towing and wrecker service, comfortable accommodations, telephone and telegraph service.

MILE 620 — LOWER POST

Historic Hudson Bay Trading Post and Indian Village. The old Indian Village, made up of log cabins strung along the high banks of the Liard River, is reached by a side road and is only a few hundred yards from the highway. Opposite this village the Dease River enters from the south and was formerly a famous north country route to the Pacific Ocean. By following up the Dease to a 20 mile portage, the pioneer traders, trappers and "voyageurs" crossed to the headwaters of the Stikine River, following it downstream to the sea about 300 miles airline from Lower Post. Camera fans will find an Indian cemetery on the river road. There is a Catholic Mission and Indian residential school here and the public is welcome to church services. Also there is a modern concrete public school for 140 children and British

Columbia Game Warden's Office, hotel, cafe and post office as well as telephone and telegraph service.

MILE 627

The highway crosses into the Yukon Territory from British Columbia. Set your watch back one hour (ahead one hour if southbound).

THE YUKON TERRITORY

The Yukon Territory of Canada is best known as the scene of the Klondike goldrush of 1897-98. Dawson, the first capital, came into being as a tent city near the confluence of the Klondike and the Yukon Rivers during the hectic stampede for gold claims after the first "strike". In 1951 the seat of government was moved to Whitehorse, largest town in the territory, but old Dawson still survives as a place of great romantic interest to visitors. Dawson is now accessible by road from Alaska and Yukon.

The Yukon Territory's White Pass and Yukon Railway, a narrow gauge with miniature coaches, locomotives, and "box" cars, is an attraction in itself, and thousands of visitors have made the scenic trip over this railroad between Whitehorse and Skagway—tidewater terminus of the railroad connecting with coastwise steamships and auto ferry to Juneau and Haines. The vast territory, 207,076 square miles in area, is still a virgin wilderness, with only its southernmost area traversed by highway and railroad. Estimated population is 10,000. The big passenger planes of the airlines soar across the immense reaches of spruce and pine forest, the innumerable lakes and rivers, virtually paralleling the Alaska Highway as they ply between points in Alaska, Whitehorse and terminal cities in Canada and the U.S.A. An ever-increasing tide of automobile and truck traffic rolls continuously over the Alaska Highway, summer and winter. Nevertheless, the vast frontier which is the Yukon remains practically unchanged—a delight to visitors.

MILE 635 — WATSON LAKE

Watson Lake and an 8 mile side road to Watson Lake Airport, near the shore of this lovely lake. The big modern airport, built in 1942, is surrounded by the personnel housing and hangars, and forms an important link in the air-staging route to Alaska and Whitehorse. Here, too, is the local headquarters for the Royal Canadian Mounted Police. Watson Lake is a new highway settlement, the site of a communications maintenance camp with public telephone and telegraph and also the site of the famous cluster of humorous "Milepost" signs set up at the road junction during construction days. Year by year passing motorists add new signs, boosting the home town. These "Mileposts" make a fine souvenir snapshot, but do not be guided by some of the "mileage" figures. There is a very modern hotel, auto courts, cafes, grocery stores, charter air service, etc. Yukon North Star Sawmills Ltd. operates a large lumber business in the area. Besides this, there is good fishing and hunting.

MILE 917.4

Junction and Traffic circle for the one mile (City Limits) side road descending to Whitehorse. This junction can be easily identified by the big "Welcome to Whitehorse" rustic sign.

WHITEHORSE

Whitehorse, now a thriving frontier town, was made capital of the Yukon Territory in 1951, when the seat of government was moved from historic old Dawson, in the Klondike. It is located on a fine level townsite, on a wide bend of the Yukon River, at an elevation of 2085 feet and is reached by a side road 1½ miles in length, which descends to the river level from the high bluffs traversed by the Alaska Highway at this point. When the White Pass & Yukon Railway was completed in June 1900 connecting Skagway with the Yukon River, Whitehorse came into being as the northern terminus. Here the famed river steamers connected the railhead to Dawson and some of these boats made the trip all the way to St. Michaels, tiny outfitting point on the Bering seacoast of Alaska. One of these boats, the old "Yukoner"—the last of the flotilla of gold rush days—was shipped in sections from Victoria, B.C. to St. Michaels, where she was assembled and made the voyage to Dawson City in 1898. She was put in service between Dawson and Whitehorse in 1900 when the railway was completed. The ruined hulk may be seen on the river front.

With the advent of the Alaska Highway, and the shipping of war material to Alaska via W.P. & Y. Railway, Whitehorse entered a second "boom" period and has grown to a population of over 7,000 (estimated 1957). The new \$2,000,000 government building was completed in 1954 and several new facilities for visitors have been recently added. At present there are several good hotels, motels, a trailer park, churches, excellent stores and curio shops, modern garages, 2 theatres, hospital, 2 banks, a weekly newspaper and a large modern airport.

Whitehorse is territorial headquarters for the world-famous Royal Canadian Mounted Police, responsible for the administration of law and order in the Yukon since 1898, although the airplane and automobile have supplanted the more romantic horse and dog team as the mode of transportation for these colorful officers of the law.

Sightseeing trips from Whitehorse may be made by auto, the famous White Pass & Yukon narrow-gauge railway, bus and plane include Miles Canyon and suspension bridge, Whitehorse Rapids, Lake LeBarge (known as the site of the "Cremation of Sam McGee" immortalized in Robert W. Service's poem) and air trips with either float or wheel planes via Pacific Western Airlines, to any point in the Yukon. Sights in the town are Sam McGee's original cabin, the "Old Log Church" erected in 1900 (Anglican), where lectures illustrated with color slides

N.W.C.S. Phone Numbers

may be seen during summer evenings, and the Mc-Bride Museum, where curios and handicrafts of the Yukon Indians and historical relics of the territory are displayed. A new steel bridge crosses the Yukon to the new suburban area across the river, where good views of the city may be had. For full information on all attractions and businesses see white and yellow section.

MILE 996 — CANYON CREEK

Telephone and Telegraph Service, cabins, cafe, gas and oil.

(Mile 996)**

Northwest Communication System Repeater Station...0

MILE 1016 — HAINES JUNCTION, Y.T.

You are now 159 miles by highway from the seaport of Haines. The Haines highway was completed in 1948 and is of good gravel construction for the first 42 miles out of Haines Junction. From this point it is "black-top" surfaced into Haines.

Motorists planning to travel to Pacific coast cities by Canadian steamships, shipping automobiles on the same boat, should inquire at Haines regarding the weekly auto and passenger ferry connecting with Canadian ships at Skagway.

There is very good lake and stream fishing close by, also there is a post office, store, garages and motels and lodges — a stopover here is well worth while.
